Bossong,2017-12-22 Internal security is often hailed as a rapidly expanding area of European integration with a growing number of strategies policies and framework agreements in recent years Yet actual cooperation when viewed closely proceeds at a halting pace raising questions as to why cooperation appears so problematic This book presents a novel theoretically informed way to understand internal security cooperation in Europe The approach treats internal security as a public good requiring collective action amongst sovereign governments All governments must contribute to the production of a public good once produced the public good benefits all governments Fundamental obstacles to producing a public good thus arise and can help explain the underlying difficulties facing European cooperation on internal security matters The chapters in this book apply a public goods approach to different internal security issues ranging from terrorism to border management and from environmental security to natural disasters Each study demonstrates how the various goals of internal security cooperation resemble different forms of public goods and thus present different kinds of obstacles to effective cooperation This book fills a theoretical gap in the literature on European internal security cooperation with a proven approach increasingly used in other scholarly fields This book was published as a special issue of European Security **The**

[The Global Automotive Industry](#) Paul Nieuwenhuis,Peter Wells,2015-08-06 The automotive industry is still one of the world s largest manufacturing sectors but it suffers from being very technology focused as well as being relatively short term focused There is little emphasis within the industry and its consultancy and analyst supply network on the broader social and economic impacts of automobility and of the sector that provides it The Global Automotive Industry addresses this need and is a first port of call for any academic official or consultant wanting an overview of the state of the industry An international team of specialist researchers both from academia and business review and analyse the key issues that make vehicle manufacturing still the world s premier manufacturing sector closely tied in with the fortunes of both

established and newly emerging economies In doing so it covers issues related to manufacturing both established practices as well as new developments issues relating to distribution marketing and retail vehicle technologies and regulatory trends and crucially labour practices and the people who build cars In all this it explains both how the current situation arose and also likely future trajectories both in terms of social and regulatory trends as the technological marketing and labour practice responses to those leading in many cases to the development of new business models Key features Provides a global overview of the automotive industry covering its current state and considering future challenges Contains contributions from international specialists in the automotive sector Presents current research and sets this in an historical and broader industry context Covers threats to the industry including globalization economic and environmental sustainability The Global Automotive Industry is a must have reference for researchers and practitioners in the automotive industry and is an excellent source of information for business schools governments and graduate and undergraduate students in automotive engineering
