Feminist Politics Deborah Orr, 2007 The essays in *Feminist Politics* contest some of the prevailing conceptualizations of identity and difference as well as the functions of these concepts in feminist political discourse and praxis Doing so they amply demonstrate that issues of identity and difference have a central place in contemporary feminist scholarship The authors of these essays have worked to develop new ways of understanding and living out differences which will both preserve and celebrate them while also fostering the necessary conditions for opening dialogue and forming new coalitions The intent of these efforts has been to thereby engender imaginative new strategies for the personal spiritual and sociopolitical changes that will enable human growth wellbeing and flourishing While the focus of the work represented here is understandably on women the issues that are raised are given additional urgency explicitly in some of the papers and implicitly in others by the situation of their concerns in the context of the world created by the Bush administration Because that administration has foregrounded issues of identity and difference in ways that are not only inhumane and often inaccurate but dangerous for all of us the new ways of thinking and acting that are proposed here have a much broader application Thus these papers truly invite not only feminists but all people to move in new directions Taken as a whole this volume represents cutting edge thinking from an international perspective in these

important and pressing areas for feminist research and praxis *The Dynamics of Two-Party Politics* Alan Ware, 2009-06-11

This book examines the role played by the parties themselves in two party systems. It rejects the argument that the behaviour of the parties is determined largely by social forces or by the supposed logic of the electoral market. Instead it shows that both structure and agency can matter. It focuses on three major aspects of change in two party systems: i) why occasionally major parties such as the British Liberals collapse; ii) why collapsed parties sometimes survive as minor parties and sometimes do not; and iii) what determines why and how major parties will ally themselves with minor parties in order to maximize their chances of winning. With respect to the first aspect it is argued that major parties are advantaged by two factors: the resources they have accumulated already and their occupying role similar to that called by Thomas Schelling a focal arbiter. Consequently party collapse is rare. When it has occurred in nation states it is the result of a major party having to fight opposition on two separate fronts. The survival of a collapsed party depends largely on its internal structure: when a party has linked closely the ambitions of politicians at different levels of office party elimination is more likely. The main arena in which agency is significant is when leadership is possible, including the politician acting as heresthetician in the rebuilding of coalitions. This is necessary for maximizing the chances of a party winning, but for various reasons coalitions between major and minor parties are usually difficult to construct.

An Anatomy Of Ghanaian Politics Naomi Chazan, 2019-02-28

The paths of African states have diverged markedly since the termination of colonial rule. Nevertheless, Ghana, the first African state to achieve independence, epitomizes both the political gyrations and the overall stagnation common to many other countries on the continent. This work concentrates on the 1969-1982 period in Ghana, focusing on two interrelated facets of African politics: the decline of state power and authority and adjustments to political recession. The author traces the dual patterns of diminution of the state and the adaptation of autonomous coping mechanisms in the separate spheres of political leadership, political structures and institutions, ideology and political economy. The dynamic of state-society interactions is then treated in terms of the rhythm of dissent, conflict and disengagement. Dr Chazan provides a comprehensive study of Ghanaian politics from the 1970s to the present. By systematically analyzing the process of political decline and regeneration, she highlights similar processes apparent elsewhere in Africa. The stress on the subtleties and direction of political change has important implications for policymakers and policy analysts alike.

The Politics of Religion and the Religion of Politics Ira Sharkansky, 2000-01-01

Prominent political theorist Ira Sharkansky looks at the intersection of religion and politics using the case of Israel, where a chief rabbi officiates along with a prime minister to examine how the two inform each other. Focusing more on similarities than differences, Sharkansky demonstrates that both religion and politics

can justify their position on the moral high ground Both are involved in shaping our values and standard of living however neither religion nor politics can claim a monopoly of virtue Political demagogues have their religious equivalents in self serving prophets and false messiahs and politicians and religious leaders both may violate the morality that they preach Sharkansky examines the place of intellectual certainty doubt charisma and passion in both realms He argues that Israel among other Western democracies where politics and religion intersect supports a successful fusion of the two The Globalization of World Politics John Baylis, Steve Smith, Patricia Owens, 2011 Now in its fifth edition this title has been fully revised and updated in the light of recent developments in world politics with new chapters on the changing nature of war human security and international ethics
