Student Exploration: Populations and Samples

Readings: Frequency distribution, normal distribution, population, sample

Prior Knowledge Questions (What do you already know about this topic?)

a. **Frequency distribution** indicates how many times some value occurs within a group of values. Suppose a large number of people were surveyed on how many hours per week they can work. The frequency at that point in the graph shows the frequency distribution of that number, without sampling.

b. How would you approximate shape of the distribution?

c. In the graph given at right, which value gives more the frequency distribution might give that the same people could describe the number hours working the year

Classroom

In many cases, a frequency distribution is skewed to the right or left. This is because the frequency distribution is skewed to the right or left. This is because the frequency distribution is skewed to the right or left. This is because the frequency distribution is skewed to the right or left.

a. The value that is the frequency of the distribution is the frequency of the distribution. This is because the frequency distribution is skewed to the right or left.
