 David Machin,2014-04-30 The primary goal of the volume on Visual Communication is to provide a collection of high quality
 accessible papers that offer an overview of the different academic approaches to Visual Communication the different
 theoretical perspectives on which they are based the methods of analysis used and the different media and genre that have
 come under analysis There is no such existing volume that draws together this range of closely related material generally
 found in much less related areas of research including semiotics art history design and new media theory The volume has a
 total of 34 individual chapters that are organized into two sections theories and methods and areas of visual analysis The
 chapters are all written by quality theorists and researchers with a view that the research should be accessible to non
 specialists in their own field while at the same time maintaining a high quality of work The volume contains an introduction
 which plots and locates the different approaches contained in it within broader developments and history of approaches to
 visual communication across different disciplines as each has attempted to define its terrain sometimes through unique
 concepts and methods sometimes through those borrowed and modified from others **Japan English Publications in**
