 Academic Libraries Taming the Tiger tackles the topic of ebooks in academic libraries a trend that has been welcomed by
 students faculty researchers and library staff However at the same time the reality of acquiring ebooks making them
 discoverable and managing them presents library staff with many new challenges Traditional methods of cataloging and
 managing library resources are no longer relevant where the purchasing of ebooks in packages and demand driven
 acquisitions are the predominant models for acquiring new content Most academic libraries have a complex metadata
 environment wherein multiple systems draw upon the same metadata for different purposes This complexity makes the need
 for standards based interoperable metadata more important than ever In addition to complexity the nature of the metadata
 environment itself typically varies slightly from library to library making it difficult to recommend a single set of practices
 and procedures which would be relevant to and effective in all academic libraries Considering all of these factors together it
 is not surprising when academic libraries find it difficult to create and manage the metadata for their ebook collections This
 book is written as a guide for metadata librarians other technical services librarians and ancillary library staff who manage
 ebook collections to help them understand the requirements for ebook metadata in their specific library context to create a
 vision for ebook metadata management and to develop a plan which addresses the relevant issues in metadata management
 at all stages of the lifecycle of ebooks in academic libraries from selection to deselection or preservation Explores the reasons
