

## BREAKERS AND FUSES

The Motor Home is equipped with a combination of breakers and fuses, the 110 volt system has a breaker box with an on-off breaker switch. Be sure this is in the on position when using 110 volt power source.

Units equipped with 110 volt roof air conditioners will have two breakers 1-15 amp for the normal power use an additional 20 amp for the roof air. In the event of a short or overload these breakers will trip to the off position. To reset, just turn them back to the on position after determining what caused the breaker to trip.

### 12 Volt in Line Fuses

12 volt in line fuses are provided for the water pump, this fuse can be found on the red wire running to the pump. There is an additional line fuse for the balance of the 12 volt circuit connected to the battery terminal under the hood, there is also a line fuse for the 12 volt combination refrigerator coming off of the same battery terminal.

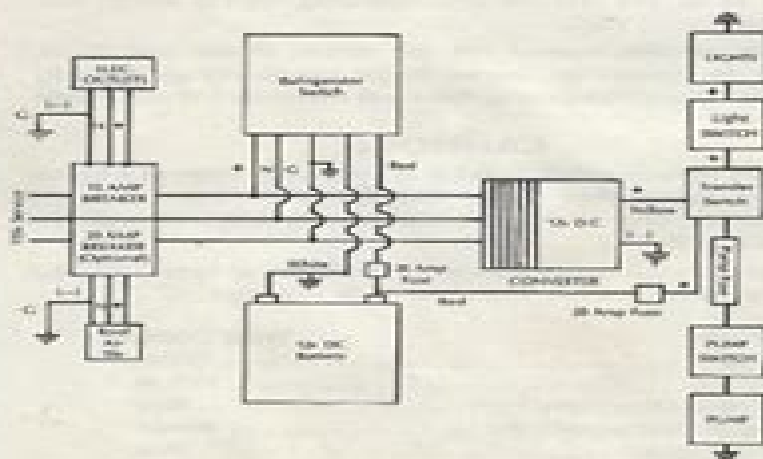

#### Note

New vehicles are shipped to the dealer with fuses out of the in line fuse holders.

### Tail lights and directional lights.

Tail lights and directional lights are wired into the vehicle and the fuses for them are under the dashboard left hand side.

The electrical schematic below defines connections, grounding, color code, fuses and breakers as applicable.
