Frey,Shuichi Fukuda,Georg Rock,2011-07-09 As the main theme of Improving Complex Systems Today implies this book is intended to provide readers with a new perspective on concurrent engineering from the standpoint of systems engineering It can serve as a versatile tool to help readers to navigate the ever changing state of this particular field The primary focus of concurrent engineering was at first on bringing downstream information as far upstream as possible by introducing parallel processing in order to reduce time to market and to prevent errors at a later stage which would sometimes cause irrevocable damage Up to now numerous new concepts methodologies and tools have been developed but over concurrent engineering s 20 year history the situation has changed extensively Now industry has to work in the global marketplace and to cope with diversifying requirements and increasing complexities Such globalization and diversification necessitate collaboration across different fields and across

national boundaries Thus the new concurrent engineering calls for a systems approach to gain global market competitiveness
