Mohd. Sofi Ali,2008 **Finding Malaysia** Zairil Khir Johari, Some of the most engaging contemporary writing has seen the

transformation of the political column into a literary art form an important way of taking in the world and thinking deeply about it In his first collection of essays Zairil Khir Johari offers quick witted and focused reflections on some of the most pressing and contentious issues of the day At the heart of the matter is the bane of Malaysian politics the ethnic question from which he explores a range of high profile issues identity secularism federalism the economy good governance and education After sixty years of nationhood Zairil finds much that is wrong with Malaysia Its eccentricities are by no means benign Yet these essays also offer answers to his own assertion that we need to move beyond this At once both philosophical and practical Finding Malaysia lays down a marker for any serious debate over the future trajectory of the country

Secondary School External Examination Systems Barend Vlaardingerbroek,Neil Taylor,2009 Summative assessment has been a contentious issue in educational circles for several decades particularly high stakes assessment events which arise at various junctures of the school cycle especially those at the end of it The French Baccalaureat and English A Levels and their numerous clones throughout the francophone and anglophone worlds are household names and represent milestone events in people s lives as their outcomes are principal determinants of young people s future prospects These examinations are external they are devised conducted and processed by agencies outside the schools usually ministerial examination units As such they act as blind arbiters of student achievement providing the proverbial level playing field which ensures the comparability of outcomes In the pyramidal school structures of yesteryear examinations acted as filters regulating the progression of pupils to subsequent tiers of formal education Exit points occurred from primary school level up from where unsuccessful candidates could enter the labour force and or embark on occupationally specific further education and training With the modernisation of the labour market and an ever higher social demand for access to higher levels of formal education the filtering function of examinations at lower levels of schooling has been gradually eroded while burgeoning numbers of students at the upper secondary level have brought about reforms that include curricular diversification and sometimes radical overhauls of terminating assessment systems including the modification and in some instances abandonment of external examinations This edited volume brings together the experiences of twenty examination systems from around the world to show how these dynamic entities have adapted over time to the changing context of schooling Following an introduction by Stephen P Heyneman of World Bank repute there are sixteen chapters presenting

Country Case Studies which have been written up under common subheadings thereby highlighting the comparative nature of the work and facilitating cross referencing The subsequent four chapters elaborate on the theme of external examinations beyond national borders including a contribution by the International Baccalaureate Organisation A defining feature of the work is the attention it pays to what it calls the nuts and bolts of external examinations from question setting to grading procedures These are it is argued instrumental in nurturing and maintaining public confidence in external examinations The book will be of immense value to people involved in educational policy studies especially strategic educational planning as well as those directly concerned with formal assessment The work has been written to appeal to a wide audience of informed persons it is accessible to teachers and interested laypeople as well as to academics *Malaysia Knowledge Based Economy Master Plans and Programs Handbook - Strategic Information and Programs* IBP, Inc.,2014-10-26 2011 Updated Reprint Updated Annually Malaysia Knowledge Based Economy Master Plan Handbook Educational Issues in Multiethnic Malaysia Tan Yao Sua,R. Santhiram, Education in multiethnic societies is a subject of considerable debates in almost all parts of the world These debates have invoked strongly felt positions between competing ethnic groups over a host of issues that have a profound impact on the nation building process Apart from deep seated issues arising from contrasting internal demands over educational rights and equality emerging issues arising from external influences such as the global spread of English as a result of globalisation have also impacted the nation building process of multiethnic societies It is against this context that educational issues in multiethnic societies merit our attention In the case of Malaysia discourses over these issues are particularly intense and hotly contested by the different ethnic groups This is primarily because of the extreme difficulties in mediating these complicated issues which are impinged by competing socio cultural economic and political interests This book explores the contested terrains of education in multiethnic Malaysia It comprises seven chapters that cover three crucial areas of educational provisions and delivery namely education of ethnic minorities education and national integration and educational language policy These three crucial areas are often the prime concerns of policy makers in multiethnic societies who have to tread a thin line in resolving these issues which are underpinned by intense coterminous interests and inter ethnic competition and having the potential to generate conflicts contestation and power struggle As far as the Malaysian policy makers are concerned their efforts in resolving these issues have not been overly successful It is most unfortunate that their policy decisions are at times influenced by competing political and ethnic interests rather than guided by sound theoretical underpinnings that could put the educational development of the country on a stronger platform and a clearer trajectory English in Southeast Asia David Prescott,2009-05-05 This book represents a new publishing venture in terms of its range of concerns with regard to English in Southeast Asia The chapters in the volume reflect the interests and themes of the annual Conferences on English in Southeast Asia held since 1996 among participating universities from nine countries Malaysia Singapore Brunei Philippines Australia Hong Kong Thailand Indonesia and New

Zealand This is believed to be the first time that such diversity and coverage has been published in a single volume The three sections of the book cover topics which have been consistently discussed at the conferences during the last ten years The Varieties section features chapters on phonology dictionary making syntax code switching and the communicative strategies of English speakers from ASEAN countries The Literacies section focuses on ICT in English language teaching Information literacy bilingual and multilingual issues in Southeast Asia recent developments in English language teaching and education in Thailand and questions of heritage and identity with respect to English in Malaysia In the Literatures section the concerns are with new generation writings in English in Malaysia the literature read by young Filipinos the use of English in Malaysian newspapers in the context of general elections the discourses of Asian English newspapers in relation to notions like globalisation and global English and ASEAN English on Internet websites As a collection of work by experienced academics engaged in the issues germane to the roles and status of English in Southeast Asia this volume is an excellent resource for university students university teaching and research staff and university library collections
