aspects of the college community and the relationships developed within that community create opportunities for transformative experiences that lead to personal and academic growth Neal Christopherson argues that transformative experiences in college are primarily the results of interactions with other people and with a broader campus community documenting the ways in which relationships with faculty experiences in courses interaction with peers and the general institutional environment can generate these experiences Christopherson also touches on extracurricular and co curricular activities the importance of a healthy environment for interacting with difference and how students transition out of the institution Scholars of education sociology and communication will find this book particularly useful **The New York Times Practical Guide to Practically Everything** Amy D. Duffy, Idana Goldberg, 2014-07-14 Admissions and financial aid policies at liberal arts colleges have changed dramatically since 1955 Through the 1950s most colleges in the United States enrolled fewer than 1000 students nearly all of whom were white Few colleges were truly selective in their admissions they accepted most students who applied In the 1960s as the children of the baby boom reached college age and both federal and institutional financial aid programs expanded many more students began to apply to college For the first time liberal arts colleges were faced with an abundance of applicants which raised new questions What criteria would they use to select students How would they award financial aid The answers to these questions were shaped by financial and educational considerations as well as by the struggles for civil rights and gender equality that swept across the nation The colleges answers also proved crucial to their futures as the years since the mid 1970s have shown When the influx of baby boom students slowed colleges began to recruit aggressively in order to

maintain their class sizes In the past decade financial aid has become another tool that colleges use to compete for the best students By tracing the development of competitive admission and financial aid policies at a selected group of liberal arts colleges *Crafting a Class* explores how institutional decisions reflect and respond to broad demographic economic political and social forces Elizabeth Duffy and Idana Goldberg closely studied sixteen liberal arts colleges in Massachusetts and Ohio At each college they not only collected empirical data on admissions enrollment and financial aid trends but they also examined archival materials and interviewed current and former administrators Duffy and Goldberg have produced an authoritative and highly readable account of some of the most important changes that have taken place in American higher education during the tumultuous decades since the mid 1950s *Crafting a Class* will interest all readers who are concerned with the past and future directions of higher education in the United States Originally published in 1997 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Two Nobodies Speak Out Sheldon Marcus, Philip D. Vairo, 2011-10-01 This book traces the journey of two individuals who have spent their lives on both sides of the teacher professor's desk Between them they went from attending kindergarten to being a college president and in that journey they held positions ranging from classroom teacher in the New York City public schools every rank of the professorial ladder to almost every administrative position available in a university In their book Marcus and Vairo are totally candid in relating their experiences in their various roles They are highly opinionated but these opinions are based on the realities they encountered with students and colleagues at all levels of education This book utilizes vignettes as well as commentaries to tell a story of two educators who have worked at every part of the United States There is little that has happened in education since the 1940s down to the present day that is not touched on in this book Marcus and Vairo are insiders with no axe to grind They tell the truth as they see it

The Last Professors Frank Donoghue, 2018-04-03 What makes the modern university different from any other corporation asked Columbia's Andrew Delbanco recently in the New York Times There is more and more reason to think less and less he answered In this provocative book Frank Donoghue shows

how this growing corporate culture of higher education threatens its most fundamental values by erasing one of its defining features the tenured professor Taking a clear eyed look at American higher education over the last twenty years Donoghue outlines a web of forces social political and institutional dismantling the professoriate Today fewer than 30 percent of college and university teachers are tenured or on tenure tracks and signs point to a future where professors will disappear Why What will universities look like without professors Who will teach Why should it matter The fate of the professor Donoghue shows has always been tied to that of the liberal arts with the humanities at its core The rise to prominence of the American university has been defined by the strength of the humanities and by the central role of the autonomous tenured professor who can be both scholar and teacher Yet in today s market driven rank and ratings obsessed world of higher education corporate logic prevails faculties are to be managed for optimal efficiency productivity and competitive advantage casual armies of adjuncts and graduate students now fill the demand for teachers Bypassing the distractions of the culture wars and other crises Donoghue sheds light on the structural changes in higher education the rise of community colleges and for profit universities the frenzied pursuit of prestige everywhere the brutally competitive realities facing new Ph D s that threaten the survival of professors as we ve known them There are no quick fixes in *The Last Professors* rather Donoghue offers his fellow teachers and scholars an essential field guide to making their way in a world that no longer has room for their dreams First published in 2008 *The Last Professors* have largely had its arguments borne out in the interim as the percentage of courses taught by tenured professors continues to dwindle This new edition includes a substantial Preface that elaborates on recent developments and offers tough but productive analysis that will be crucial for today s academics to heed
