Status Envy Anne Hendershott, 2011-12-31 The debate within Catholic educational circles on whether church sponsored colleges and universities perpetuate mediocrity by giving too great a priority to the moral development of students instead of scholarship and intellectual excellence continues in this book by sociologist Anne Hendershott She asserts that part of the reason for the crisis of faith within Catholic colleges is due to status envy the desire to compete with the top colleges in the country Catholic universities are generally not rated as top notch They are viewed as having a lower status than secular institutions which of course creates resentment Catholic universities in turn become more secular as they become consumed with status concerns Detailing how this resentment manifests itself on campuses Hendershott explains faculty and administrative attempts to distance universities from Catholic ideas and curriculum Some have distanced themselves so far from their Catholic origins that the church no longer recognizes them as Catholic institutions The author questions whether even determined Catholic universities will be able to avoid the pressures to become more secular Hendershott who clearly sympathizes with the original mission of Catholic universities leads the reader through the earliest signs that Catholic colleges were beginning to lose their way in the 1960s up through the ongoing issues of feminism and homosexuality and their impact In focusing on these secular issues colleges are denying exposure to the traditional Catholic views on subjects such as homosexuality women's ordination and abortion Like all culture wars the interaction among people defines the situation The campus is a reflection of the greater culture between those who assert that there are no truths only readings and those who believe that the truths have been revealed and require constant rereading and application It is a conflict between those dedicated to the negation of the authority of Scripture and the hierarchy of the church and those proposing a renaissance of the Catholic intellect and a renewed appreciation of the church itself Choosing State Supreme Court

Justices Greg Goelzhauser, 2016-06-15 Since 1940 more than half of all states have switched at least in part from popular election or elite appointment to experiment with merit selection in choosing some or all of their state supreme court justices Under merit selection a commission often comprising some combination of judges attorneys and the general public is tasked with considering applications from candidates vying to fill a judicial vacancy Ostensibly the commission forwards the best candidates to the governor who ultimately appoints them Presently numerous states are debating whether to adopt or abolish merit selection In his short sharp book *Choosing State Supreme Court Justices* Greg Goelzhauser utilizes new data on more than 1 500 state supreme court justices seated from 1960 through 2014 to answer the question Does merit selection produce better types of judges He traces the rise of merit selection and explores whether certain judicial selection institutions favor candidates who have better qualifications are more diverse and have different types of professional experience Goelzhauser's results ultimately contribute to the broader debate concerning comparative institutional performance with respect to state judicial selection

The Impoverishment of the American College Student James V. Koch, 2019-07-09 Is the end in sight for college tuition hikes Tuition and fees at public colleges and universities consistently have risen twice or even three times as fast as comparable increases in the Consumer Price Index in recent years Since 2000 these costs have even grown 60 percent faster than health care costs The results have been rapidly rising student debt now 1.4 trillion nationally rising delinquencies in debt repayment and a dysfunctional stratification of public college student bodies on the basis of family incomes This is a broken unsustainable model for the majority of public colleges Why has this occurred The multiple causes include declining state support the avaricious behavior of individual institutions their reluctance to adopt productivity increasing innovations their cost increasing competition for higher U S News ratings and misdirected federal student financial aid policies The key actors are the 50 000 members of the governing boards of public colleges who too often forget that their primary responsibility is to citizens taxpayers and the 15 million students Instead board members are co-opted by clever administrators into approving tuition and fee increases well beyond what is needed to make up for declining state funding Concerted informed public pressure on governors legislators and board members is necessary to move institutions in more positive directions Higher education funding and tuition and fee inflation are complicated matters that very few people understand well *The Impoverishment of the American College Student* clarifies the central issues and provides plentiful data to support its key points It is a must read for anyone who believes that maintaining access to and the affordability of public colleges are vitally important to our society's future

Tamanaha, 2022-12-22 An essential title for anyone thinking of law school or concerned with America's dysfunctional legal system Library Journal On the surface law schools today are thriving Enrollments are on the rise and law professors are among the highest paid Yet behind the flourishing facade law schools are failing abjectly Recent front page stories have detailed widespread dubious practices including false reporting of

LSAT and GPA scores misleading placement reports and the fundamental failure to prepare graduates to enter the profession Addressing all these problems and more is renowned legal scholar Brian Z Tamanaha Piece by piece Tamanaha lays out the how and why of the crisis and the likely consequences if the current trend continues The out of pocket cost of obtaining a law degree at many schools now approaches 200 000 The average law school graduate s debt is around 100 000 the highest it has ever been while the legal job market is the worst in decades Growing concern with the crisis in legal education has led to high profile coverage in the Wall Street Journal and the New York Times and many observers expect it soon will be the focus of congressional scrutiny Bringing to the table his years of experience from within the legal academy Tamanaha provides the perfect resource for assessing what s wrong with law schools and figuring out how to fix them Failing Law Schools presents a comprehensive case for the negative side of the legal education debate and I am sure that many legal academics and every law school dean will be talking about it Stanley Fish Florida International University College of Law **University, Inc.**

Jennifer Washburn,2008-08-01 Our federal and state tax dollars are going to fund higher education If corporations kick in a little more should they be able to dictate the research or own the discoveries During the past two decades commercial forces have quietly transformed virtually every aspect of academic life Corporate funding of universities is growing and the money comes with strings attached In return for this funding universities and professors are acting more and more like for profit patent factories university funds are shifting from the humanities and the less profitable science departments into research labs and the skill of teaching is valued less and less Slowly but surely universities are abandoning their traditional role as disinterested sources of education alternative perspectives and wisdom This growing influence of corporations over universities affects more than just today s college students and their parents it compromises the future of all those whose careers depend on a university education and all those who will be employed governed or taught by the products of American universities
