Upside Down Off The Map:

Journey to the Center of the City Randy White, 1996-11-14 Randy White tells how he and his family left suburbia to live and minister in a disadvantaged area of Fresno California Their compelling story will show you God's heart for the city and help you discover how you can make a difference in today's cities Navigation for Off-Road Runners Stuart Ferguson, 2012-10-02 With off road running the ability of knowing where you are going is a fundamental skill Unfortunately for many runners the secrets of navigation are akin to the secrets of the dark arts of black magic Specifically with the runner in mind this book presents in an easy to understand manner all the skills and techniques that are required for the beginner through to the advanced user Navigation for Off Road Runners will give you the confidence to go further Maps: their untold stories Rose Mitchell, Andrew Janes, 2014-09-11 A map is a snapshot of a place a city a nation or even the world at a given point in time fascinating for what they tell us about the way our ancestors saw themselves their neighbours and their place in the world This magnificent collection drawn from seven centuries of maps held in the National Archives at Kew looks at a variety of maps from those found in 14th Century manuscripts through early estate maps to sea charts maps used in military campaigns and maps from treaties The text explores who the mapmakers were the purposes for which the maps were made and what it tells us about the politics of the time Great images are accompanied by compelling stories Featured is a woodcut map of 16th Century London a map of where the bombs fell during the Second World War and a map the first American settlers drew when they were attempting to establish a new empire on Roanoke Island off the coast of what is now North Carolina Richly illustrated with large scale reproductions of the maps the book also includes some of the more amusing or esoteric maps from the National Archives such as the map of the Great Exhibition in 1851 that was presented on a lady's glove a London Underground map in the form of a cucumber and a Treasure Island map used to advertise National Savings This is a fascinating and unusual journey through the world of maps and mapmakers **Morphisms and Categories** Jean Piaget, Gil Henriques, Edgar Ascher, 2013-05-13 Despite dissent in many quarters Piaget's epistemology and the developmental psychology derived from it remain the most powerful theories in either field From the beginning Piaget's fundamental epistemological notion was that all knowledge is rooted in action and for a long time he identified action with transformation What is known is that which remains constant under transformatory action This book represents a fundamental reformulation of that point of view Alongside transformatory schemes Piaget now presents evidence that nontransformatory actions comparisons that create morphisms and categories among diverse situations constitute a necessary and complementary instrument of knowledge This work aims to elucidate that insight experimentally and theoretically and to understand the developmental interaction of comparing and transforming as knowledge is constructed This first English translation of Piaget's work includes studies of children's understanding of geometric forms machines and abstract concepts It contains a clear statement of his mature position on continuity with biology as well as with the history of

ideas **Interpreting Our World** Joseph J. Kerski, 2016-10-17 This important book demonstrates why geography matters in the modern day world through its examination of 100 moments throughout history that had a significant impact on the study of geography literally writing about the earth Geography is not simply accounts of the lands of earth and their features it s about discovering everything there is to know about our planet This book shows why geography is of critical importance to our world s 21st century inhabitants through an exploration of the past and present discoveries that have been made about the earth It pinpoints 100 moments throughout history that had a significant impact on the study of geography and the understanding of our world including widely accepted maps of the ancient world writings and discoveries of key thinkers and philosophers key exploration events and findings during the Age of Discovery the foundations of important geographic organizations and inventions in digital mapping The book begins with a clear explanation of geography as a discipline a framework and a way of viewing the world followed by coverage of each of the 100 discoveries and innovations that provides sufficient background and content for readers to understand each topic The book concludes with a concise synopsis of why it all matters and a look forward to 10 possible future discoveries in the next 50 years of geography Students will gain a clear sense of what is truly revolutionary about geography perhaps challenging their preconceived notion of what geography actually is and grasp how important discoveries revolutionized not only the past but the present day as well Candy Kevin Brooks, 2014-07-03 Joe is hooked from the moment he sees Candy What is it that catches his eye Is it her hair her smile or just the way she s standing When they chat over coffee there s an instant attraction but can love ever be this sweet
