Rural Road Engineering in Developing Countries Jasper Cook, Robert Christopher Petts, 2023-08-02 Rural Road Engineering in Developing Countries provides a comprehensive coverage of the planning design construction and maintenance of rural roads in developing countries and emerging nations It covers a wide range of technical and non technical problems that may confront road engineers working in the developing world focusing on rural roads which provide important links from villages and farms to markets and offer the public access to health education and other services essential for sustainable development Most textbooks on road engineering are based on experience in industrialised countries with temperate climates or deal only with specific issues with many aspects of the design and construction of roads in developing regions stemming from inappropriate research undertaken in Europe and the USA These approaches are frequently unsuitable and unsustainable for rural road network environments particularly in low to middle income countries This book takes on board a more recent research and application focus on rural roads integrating it for a broad range of readers to access current information on good practice for sustainable road engineering in developing countries The book particularly suits transportation engineers development professionals and graduate students in civil engineering

New Developments in Soil Characterization and Soil Stability Wissem Frikha, Shima Kawamura, Wen-Cheng Liao, 2018-07-18 This book presents new studies dealing with the attempts made by the scientists and practitioners to address contemporary issues in geotechnical engineering such as characterization of soil geomaterials soil stability and some other geomechanics issues that are becoming quite relevant in today s world Papers were selected from the 5th GeoChina International Conference on Civil Infrastructures Confronting Severe Weathers and Climate Changes From Failure to Sustainability held on July 23 25 2018 in HangZhou China

Jute Geotextiles and their Applications in Civil Engineering Tapobrata Sanyal, 2016-09-26 This book presents a first of its kind exposition on the emerging technology of jute fiber geotextiles The book covers the characteristics of jute fiber and jute yarns types and functions of jute geotextiles and the mechanism of control of surficial soil with jute geotextiles The content also includes applications such as the mechanisms of functioning of jute geotextiles in strengthening road sub grade and controlling river bank erosion stabilization of earthen embankments management of

settlement of railway tracks and consolidation of soft soil by use of pre fabricated vertical jute drains PVJD Geotextile standards properties and test methods variants of jute geotextiles economical and environmental advantages in different applications are covered along with a few case studies A chapter on soil basics is included to enable clearer understanding of soil mechanisms The book can be used as a reference work or as primary or supporting text for graduate and professional coursework It will also prove useful to researchers and practicing engineers looking for a comprehensive treatise on jute geotextiles

Computer-Aided Highway Engineering Sandipan Goswami, Pradip Sarkar, 2021-08-24 Computer Aided Highway Engineering is aimed at developing professional knowledge in the field of highway engineering with adequate skills in planning designing and implementation of the highway project with an exposure of hands on training of computer software in designing the worldwide road infrastructures It discusses Digital Terrain Model DTM using satellite data including highway geometric pavement and tunnel design supported by relevant tutorials Quantity estimation cost estimation and production of various types of construction drawings are described in detail with theory and tutorials backed by real project data Recognizes the role of information and computer technology in various aspects of highway design Reviews different tasks for feasibility studies and DPR with software applications Explores topographic survey Digital Terrain Model DTM and highway geometrics and pavement and drainage design Discusses project estimations for various revisions of the engineering work Includes HEADS Pro along with chapter wise tutorials containing design and field data tutorial guides and various tutorial videos This volume is aimed at Professionals in Civil Engineering Highway Engineering Transport Planning and Town Planning and Traffic Engineering
