Flynn, 2015-04-01 What is a rubric and how are they being used in teacher education and evaluation When did rubrics become ubiquitous in the field of education What impact do rubrics have on students teachers teacher educators and the educational enterprise This book is an edited volume of essays that critically examine the phenomenon of rubrics in teacher education evaluation and education more broadly Rubrics have seen a dramatic rise in use and presence over the past twenty five years in colleges of education and districts across the country Although there is a wealth of literature about how to make rubrics there is scant literature that explores the strengths and weaknesses of rubrics and the impact the rubric phenomenon is having in reshaping education The chapters included in this edited volume will critically reflect on the contemporary contexts of rubrics and the uses and impact of rubrics in education Since rubrics have become indelible in education it is necessary for a fuller nuanced discussion of the phenomenon Creating a book that explores these aspects of rubrics is timely and fundamental to expanding the discourse on this ubiquitous evaluation tool This book is not meant to be a series of chapters dedicated to best practices for creating rubrics nor is this text meant to present all sides of the rubric discussion Rather this text intends to offer critical polemics about rubrics that can spur greater critical discussion about a phenomenon in education that has largely been unquestioned in the literature **A Collection of Performance Tasks & Rubrics:**

Microliteratures is an innovative examination of writings done in the margins of medieval manuscripts and early modern books Not always as formal as glosses sometimes feverish and abbreviated these marginal writings or microliteratures are the product of readers thinking with the text at the center of the page Jes s R Velasco argues that microliteratures are not private annotations but rather a humanistic activity performed in the public sphere These marginal engagements with texts are made public to future readers of the same book Surveying the microliteratures of a wide range of medieval and early modern Iberian genres legal religious chivalric and political texts Velasco finds that in the shared space and time of reading microliterary actions and artifacts are also models of public humanities work that connects texts to contemporary issues Microliteratures emerge from this ambitious book as a way of understanding the self as a reflective and politically engaged reader in conversation with past present and future readers as contemporaries Intelligent Human Systems Integration

**Rules, Rubrics and Riches** Shailaja Fennell, 2013-02-01 Rules Rubrics and Riches highlights the limitations of existing approaches to understanding the relationship of the law to the process of development It interrogates neoclassical economic thinking that draws on the narrow rubric of self interest to understand the acquisition of riches It takes issue with both the traditional law and development movement that was unable to shake colonial overtones and the more recent law and economics school that continues to emphasise the centrality of rational man at the micro level and the superiority of linear models of economic progress at the macro level Written as an analysis of and commentary on the contribution of the law to international development using legal cases and development trajectories in China India and Malaysia the book makes the case that individuals do not operate in a

vacuum but rather within the social contexts of larger human structures such as family community and nation Rules Rubrics and Riches is distinctive in the view that demanding equality for the individual is inappropriate if this occurs without looking at the broader context of the need for equity within families communities and nations The book offers a new frame for law and development thinking that point to a new set of rules using a broader rubrics to ensure a sustainable accumulation of riches It will be of interest to students and scholars working in the fields of law and development development studies and international and comparative law
