The Dispersion of Power Samuel Ely Bagg,2024 The Dispersion of Power is an urgent call to rethink centuries of conventional wisdom about what democracy is why it matters and how to make it better Drawing from history social science psychology and critical theory it explains why elections do not and cannot realize the classic ideal of popular rule and why prevailing strategies of democratic reform often make things worse Instead Bagg argues we should see democracy as a way of protecting public power from capture an alternative vision that is at once more realistic and more inspiring Despite their many shortcomings real world elections do prevent the most extreme forms of tyranny and are therefore indispensable In dealing with the vast inequalities that remain however we cannot rely on standard solutions such as electoral reform direct democracy deliberation and participatory governance Instead Bagg shows protecting and enriching democracy requires addressing underlying inequalities of power directly In part this entails substantive policies attacking the advantages of wealthy elites Even more crucially deepening democracy requires the organization of oppositional countervailing power among ordinary people Neither task is easy but historical precedents exist in both cases and if democracy is to survive contemporary crises leaders and citizens alike must find ways to revive and reinvent these essential democratic practices for the 21st century

God and Globalization Max L.. Stackhouse,Peter J.

Paris,2000-06-01 In the late 20th century the world has grown increasingly smaller because of advances in technology and the erosion of the nation state as a political paradigm The process of globalization with its promises of a common culture a common currency and a common government offers a new political model for the world that fosters unity and community At the same time however this process threatens to destroy the values norms and ideals that particular cultures have wrought and established and to thereby diminish the power of each culture s unique identity As globalization occurs society must decide which values will be normative and what roles that social institutions like religion and education will play in selecting and fostering these values The contributors to this volume examine both the promise and the threat of globalization using the tools of theological ethics to understand and evaluate the social contexts of life at the deepest moral and spiritual levels This inaugural volume of a projected four volume series Theology for the 21st Century God and Globalization examines five spheres of life economics Mammon political science Mars psychology and sexuality Eros the mass media and the arts Muses and religion that foster normative values for society As the writers argue their efforts attempt to determine whether God is behind globalization in any substantive way Contributors to the volume include Roland Robertson University of Pittsburgh
