Michael R. Jackson,2021-11-25 From Roentgen to Rembrandt Hounsfield to Hollywood and Vesalius to videogames Imagining Imaging explores the deeply entwined relationship between art and visual based culture and radiology medical imaging Including artworks from numerous historical eras representing varied geographic locations and visual traditions alongside a diverse range of contemporary artists Dr Jackson argues that the foundations of medical image construction and interpretation were laid down in artistic innovations dating back hundreds and thousands of years Since the discovery of X rays artists and moviemakers have in turn drawn rich inspiration from radiographic imagery and concepts but the process of cross pollination between art and science has continued with creative endeavour continuing to mould medical imaging examinations to this day Blending a unique mix of art science and medical history together with aspects of visual neurophysiology and psychology Imagining Imaging is essential reading for radiologists radiographers and artists alike Peppered with familiar TV and film references personal insights into the business of image interpretation and delivered in an accessible and humorous style the book will also appeal to anyone who enjoys looking at pictures Key features Engaging synthesis of art and medical history combined with anecdotes and experiences from a working clinical radiologist Diverse range of visual reference points including astronomy botany and cartography alongside comprehensive discussion of medical imaging modalities including plain radiography ultrasound CT and MRI 200 full colour illustrations Digital switchover of television and radio in the United Kingdom Great Britain: Parliament: House of Lords: Select Committee on Communications,2010-03-29 The Committee warns of a major public reaction against radio digital switchover scheduled for 2015 unless the Government make the case for switchover and keep the public informed about its impact There is public confusion and industry uncertainty over radio switchover and concern that due to the lack of public information people are still buying analogue radios which will be out of date in a few years time Retailers gave evidence stating that they are not getting adequate information on switchover plans so are unable to offer consumers accurate guidance when making purchases The report also points out that car manufacturers are still fitting analogue radios in new cars and digital radios will not be fitted as standard in all cars until 2013 The radio switchover is contrasted with the television switchover programme finding that the benefits of TV switchover were well understood in contrast surveys show that the public are generally happy with the present FM radio system and with the range of programmes that are provided The Committee recommends urgent steps on a range of actions including providing a detailed plan for universal digital radio coverage including how it is to be funded developing a policy for the long term use of FM devising a help scheme for radio switchover financed by general taxation rather than the BBC licence fee ensuring new digital car radios are fitted with a multi standard chip to enable their use overseas encouraging radio manufacturers and retailers to devise a sensible scrappage scheme for redundant analogue radios It is also noted that the BBC and Government disagree over whether the cost of universal digital

coverage of their national stations can be met under the current licence fee The report says that it is essential that a firm and unambiguous plan for funding the completion of build out of the digital radio service is put in place as soon as possible The report concludes reversing current policy would be unproductive given the amount of investment in digital radio already and while the switchover in 2015 is ambitious a change of target date is not favoured at this stage *The Motor* ,1904
