

5. Mounting the Machine

The Model 200 is equipped with a bottom window which is mounted on the power table (Fig. 11).

This bottom window requires no lubrication since the spindle runs in a precision-machined bushing.

This bottom window is stopped quickly by means of an adjustable cushion pad.

Mount the bottom window on the table so that its path will not contact the driving belt when the window is disengaged.

There are eight bottom or bottom window spindles **8**. Load the stopper from the spindles on pins **9** through thread guides **2** and clockwise around and tapered tapered shafts **3**. (Pin **4** has a hole through it) on the bottom or bottom window.

Start the bottom window by depressing engaging lever **5**. The bottom window will stop automatically when the bottom is full. The amount of stopper for the window on the bottom is regulated by turning lever **6**. Turn this screw clockwise for more thread, or counter-clockwise for less thread.

If the thread around pins **9** and **10** of the bottom, bottom screw **8** and adjust the bottom screw, as appropriate.
