Al Sweigart, 2025-05-20 The bestselling introduction to Python programming, revised to include the latest Python features, improved explanations, and new chapters about databases and sound files. If you've ever spent hours renaming files or updating hundreds of spreadsheet cells, you know how tedious tasks like these can be. But what if you could have your computer do this work for you? In this fully revised third edition of *Automate the Boring Stuff with Python*, you'll learn how to use Python to write programs that do in minutes what would take you hours to do by hand, no prior programming experience required. Early chapters will teach you the fundamentals of Python through clear explanations and engaging examples. You'll write your first Python program, work with strings, lists, dictionaries, and other data structures, then use regular expressions to find and manipulate text patterns. Once you've mastered the basics, you'll tackle projects that teach you to use Python to automate tasks like searching the web, downloading content, and filling out forms; finding, extracting, and manipulating text and data in files and spreadsheets; copying, moving, renaming, or compressing saved files on your computer; splitting, merging, and extracting text from PDFs and Word documents; interacting with applications through custom mouse and keyboard macros; managing your inbox; unsubscribing from lists; and sending email or text notifications. New to this edition: All code and examples have been thoroughly updated. You'll also find four new chapters on database integration, speech recognition, and audio and video editing, as well as 16 new programming projects and expanded coverage of developer techniques like creating command-line programs. Don't spend your time on work a well-trained monkey could do. Even if you've never written a line of code, you can pass off that grunt work to your computer. Learn how in *Automate the Boring Stuff with Python*.

ENTIRE APPROACH TO PERSUASION Is there anything worse than a high pressure salesperson pushing you to say yes then sign on the dotted line before you re ready If there s one lesson Oren Klaff has learned over decades of pitching presenting and closing long shot high stakes deals it s that people are sick of being marketed and sold to Most of all they hate being told what to think The more you push them the more they resist What people love however is coming up with a great idea on their own even if it s the idea you were guiding them to have all along Often the only way to get someone to sign is to make them feel like they re smarter than you That s why Oren is throwing out the old playbook on persuasion Instead he ll show you a new approach that works on this simple insight Everyone trusts their own ideas If rather than pushing your idea on your

buyer you can guide them to discover it on their own they'll believe it, trust it, and get excited about it. Then they'll buy in and feel good about the chance to work with you. That might sound easier said than done, but Oren has taught thousands of people how to do it with a series of simple steps that anyone can follow in any situation. And as you'll see in this book, Oren has been in a lot of different situations. He'll show you how he got a billionaire to take him seriously, how he got a venture capital firm to cough up capital, and how he made a skeptical Swiss banker see him as an expert in banking. He'll even show you how to become so compelling that buyers are even more attracted to you than to your product. These days, it's not enough to make a great pitch. To get attention, create trust, and close the deal, you need to flip the script.
