Planting Noel Kingsbury, Piet Oudolf, 2013-04-09 Planting A New Perspective is an essential resource for designers and gardeners looking to create plant rich beautiful gardens that support biodiversity and nourish the human spirit An intimate knowledge of plants is essential to the success of modern landscape design and Planting makes Oudolf s considerable understanding of plant ecology and performance accessible explaining how plants behave in different situations what goes on underground and which species make good neighbors Extensive plant charts and planting plans will help you choose plants for their structure color and texture as well as the way they perform in the landscape A detailed directory with details like each plant s life expectancy the persistence of its seedheads its tendency to spread and propensity to self seed this book is a beautiful and invaluable resource

Planting Design Patrick Mooney, 2019-10-30 Landscape designers have long understood the use of plants to provide beauty aesthetic pleasure and visual stimulation while supporting a broad range of functional goals However the potential for plants in the landscape to elicit human involvement and provide mental stimulation and restoration is much less well understood This book meshes the art of planting design with an understanding of how humans respond to natural environments Beginning with an understanding of human needs preferences and responses to landscape the author interprets the ways in which an understanding of the human environment interaction can inform planting design Many of the principles and techniques that may be used in planting design are beautifully illustrated in full colour with examples by leading landscape architects and designers from the United Kingdom Europe North America and Asia including Andrea Cochran Andrea Cochran Landscape Architecture San Francisco CA Design Workshop Inc Richard Hartlage Land Morphology Seattle WA Shunmyo Masuno Japan Landscape Consultants Ltd Yokohama Piet Oudolf Hummelo The Netherlands Melody Redekop Vancouver Christine Ten Eyck Ten Eyck Landscape Architects Inc Austin TX Kongjian Yu Turenscape Ltd Beijing The book stimulates thought provides new direction and assists the reader to find their own unique design voice Because there are many valid processes and intentions for landscape design the book is not intended to be overly prescriptive Rather than presenting a strict design method and accompanying set of rules Planting Design provides information insight and inspiration as a basis for developing the individual designer s own expression in this most challenging of art forms

In this captivating exploration, readers embark on a journey beyond the visible spectrum of leaves and blossoms, delving into the intricate lives of plants. From the secret language encoded in leaves to the underground networking of roots, each chapter of this botanical odyssey offers a revelation exposing the vibrant and dynamic world that exists beneath the surface of our familiar landscapes. As we traverse the chapters, we encounter the social lives of flowers where intricate dynamics and surprising alliances shape the floral community. We witness the botanical romances where plants express attraction and compete for pollination in a dance of loves and heartbreaks. The narrative unfolds with a discussion on photosynthetic personalities offering insights into how different plants exhibit unique behaviors in response to environmental factors. The exploration takes an intriguing turn with a glimpse into the dark side of photosynthesis, delving into plant rivalries and conflicts that add a layer of drama to the botanical tapestry. Readers are then invited to decipher tree talk, unraveling the mysteries of communication between trees as leaves and branches convey messages in a silent but profound language. Green Realm doesn't stop at the terrestrial boundaries; it boldly ventures into the extraterrestrial with a chapter contemplating the possibility of plant life beyond Earth. The cosmic possibilities of extraterrestrial plant psychology are explored, sparking the imagination with the prospect of green alchemists flourishing on distant planets. The narrative concludes with a contemplation of the future of plant-human relationships in the chapter *Cultivating a New Perspective*. Readers are encouraged to view plants in a new light, appreciating their complexity and acknowledging the transformative impact of understanding plant psychology.
