*Atlas and Manual of Plant Pathology* E.H. Barnes, 2012-12-06 Ideally a textbook should integrate with the lectures and labs in a science course. Selecting such a book can be an onerous and sometimes impossible task for the teacher. Students are wary of getting stuck with a useless book, i.e. one to which the instructor never refers. The reader probably has some practical appreciation of their concern. I remember an instructor who not only denounced the very text he had chosen but also informed the class that he wouldn't be using it. This was after I had already purchased a copy. Being mindful of the foregoing, I decided to try Barnes' *Atlas and Manual of Plant Pathology* in 1973. Six years and 800 students later, I have no regrets about my choice. As far as I am concerned, it is still the finest book of its kind on this continent. Barnes' *Atlas* contains an excellent blend of the diagnostic and experimental aspects of plant pathology. His treatment of each disease on an individual basis allows the instructor to omit some pathogens without disturbing the book's continuity. My one semester course in Forest Pathology is largely descriptive. Strong emphasis is placed on field recognition of symptoms and signs. This is facilitated by Barnes' technique. In a sequence of photographs, the diseased plant or part is first viewed as a whole to show the general symptoms. This is usually followed by a close-up of the signs, i.e.

*Principles of Plant Pathology* Charles Elmer Owens, 1928. Modern plant pathology. Definition of symptoms and classification of plant diseases. Methods of investigating plant diseases. Plant diseases as related to environment. Plant diseases control. General statement. Fungicides. Disease free seed and nursery stock. Quarantine and inspection. Sick soil. Disease resistance in plants. Relation of insects to plant diseases. Diseases caused by slime molds. Diseases caused by bacteria. Diseases caused by fungi phycmycetes. Diseases caused by fungi ascomycetes. Diseases caused by fungi basidiomycetes. Diseases caused by fungi imperfecti. Diseases caused by algae. Diseases caused by parasitic seed plants. Diseases caused by nematodes. Virus diseases. Non parasitic diseases.

The Teacher's manual contains information designed to facilitate use of this kit by instructors and teaching assistants who may not be familiar with a particular plant pathogen system. Included are additional background information for instructors, sources of materials, list of materials needed, step-wise preparation procedures, suggested schedules for conducting the exercises, including time required, a discussion of expected results, answers to questions, and additional references. The listing of sources of material provided in case material is not available from a local source or regular supplier.

Barké,1981 The second edition of this widely used manual has been revised and updated Some drawings and illustrations have been replaced and new ones added Suggestions have been made to divide the manual into two separate editions one on the study of insects and related forms the other on the study of plant diseases However many of the studies involve both these fields of plant protection The authors believe that in an applied introductory course their integration gives the students a much broader basis of understanding the problems involved in diagnosing and controlling plant health problems We therefore have decided to retain the integrated format
