Van Der Waerden, 2012-12-06 Soon after the publication of my *Ontwakende Wetenschap* the need for an English translation was felt We were very glad to find a translator fully familiar with the English and Dutch languages and with mathematical terminology The publisher Noordhoff had the splendid idea to ask H G Beyen professor of archeology for his help in choosing a nice set of illustrations It was a difficult task The illustrations had to be both instructive and attractive and they had to illustrate the history of science as well as the general background of ancient civilization The publisher encouraged us to find better and still better illustrations and he ordered photographs from all over the world with never failing energy and enthusiasm Mr Beyen's highly instructive subscripts will help the reader to see the inter relation between way of living art and science of the ancient world Thanks are due to many correspondents who have suggested additions and pointed out errors Sections on Astrolabes and Stereographic Projection and on Archimedes construction of the heptagon have been added The sections on Perspective and on the Anaphorai of Hypsicles have been enlarged In the second English edition I have incorporated an important discovery of P Huber which sheds new light upon the role of geometry In Babylonian algebra see p 73 The section on Heron's Metrics see p 277 was written anew following a suggestion of E M Bruins Zurich 1961 B L
