Canon Law in the Age of Reforms (c. 1000 to c. 1150) Christof Rolker, 2023-09-29 This monograph addresses the history of canon law in Western Europe between ca 1000 and ca 1150 specifically the collections compiled and the councils held in that time The main part consists of an analysis of all major collections taking into account their formal and material sources the social and political context of their origin the manuscript transmission and their reception more generally As most collections are not available in reliable editions a considerable part of the discussion involves the analysis of medieval manuscripts Specialized research is available for many but not all these works but tends to be scattered across miscellaneous publications in English German French Italian and Spanish one purpose of the book is thus to provide relatively uniform up to date accounts of all major collections of the period At the same time the book argues that the collections are much more directly influenced by the social milieu from which they emerged and that more groups were involved in the development of high medieval canon law than it has previously been thought In particular the book seeks to replace the still widely held belief that the development of canon law in the century before Gratian's *Decretum* ca 1140 was largely driven by the Reform papacy Instead it is crucial to take into account the contribution of bishops monks and other groups with often conflicting interests Put briefly local needs and conflicts played a considerably more important role than central papal reform on which older scholarship has largely focused

The reconstruction of ancient Mesopotamian medical ritual and omen compendia and their complex history is still characterised by many difficulties, debates and gaps due to fragmentary or unpublished evidence. This book offers the first complete edition of the Assur Medical Catalogue, an 8th or 7th century BCE list of therapeutic texts which forms a core witness for the serialisation of medical compendia in the 1st millennium BCE. The volume presents detailed analyses of this and several other related catalogues of omen series and rituals constituting the corpora of divination and healing disciplines. The contributions discuss links between catalogues and textual sources, providing new insights into the development of compendia between serialization, standardization and diversity of local traditions. Though it's a novel corpus-based approach, this volume revolutionizes the current understanding of Mesopotamian medical texts and the healing disciplines of conjurer and physician. The research presented here allows one to identify core text corpora for these disciplines as well as areas of exchange and borrowings between them.
