ORGANIZATION OF LIVING THINGS

SCIENCE IN FOCUS – BIODIVERSITY, EARLY

How Do You Understand How Are Living Things Organized?

Living things are organized into different levels of organization. The levels of organization are: cell, tissue, organ, organ system, organism, population, community, ecosystem, and biosphere. Each level of organization has a specific function and is made up of different parts.

Cells are the basic units of life. They are made up of different parts and perform specific functions. Tissues are groups of cells that work together to perform a specific function. Organs are made up of different tissues and perform specific functions. Organ systems are made up of different organs and perform specific functions. Organisms are made up of different organ systems and perform specific functions. Populations are made up of different organisms and perform specific functions. Communities are made up of different populations and perform specific functions. Ecosystems are made up of different communities and perform specific functions. Biospheres are made up of different ecosystems and perform specific functions.
