*Wonderdog* Jules Howard, 2022-11-01 A celebration of dogs the scientists who ve lived alongside them and how canines have been key to advancements in science for the betterment of all species Almost everywhere there are humans on planet Earth there are dogs But what do dogs know and understand of the world Do their emotions feel like our own Do they love like we do What do they think of us Since our alliance first began on the hunt and on the farm our relationship with dogs has evolved considerably And with domestic dog population rising twenty per cent in the last decade alone it is a bond that will continue to evolve In order to gauge where our relationship with dogs goes from here author and zoologist Jules Howard takes a look at the historical paths we have trod together and at the many scientists before him who turned their analytic eye on their own four legged companions Charles Darwin and his contemporaries toyed with dog sign language and made special puzzle boxes and elaborate sniff tests using old socks Later the same questions drove Pavlov and Pasteur to unspeakable cruelty in their search for knowledge Since then leagues of psychologists and animal behaviourists have built upon the study of dogs and their much improved methods have fetched increasingly important results dogs have episodic memory similar to ours they recognise themselves as individuals and in addition to their expert sense of smell dogs noses can even detect thermal radiation With the help of vets ethologists neurologists historians and naturally his own dogs Wonderdog reveals the study of dogs to be key in the advancement of compassion in scientific research and crucial to making life on Earth better for all species

Science Fiction, Ethics and the Human Condition Christian Baron, Peter Nicolai Halvorsen, Christine Cornea, 2017-07-10 This book explores what science fiction can tell us about the human condition in a technological world with the ethical dilemmas and consequences that this entails This book is the result of the joint efforts of scholars and scientists from various disciplines This interdisciplinary

approach sets an example for those who like us have been busy assessing the ways in which fictional attempts to fathom the possibilities of science and technology speak to central concerns about what it means to be human in a contemporary world of technology and which ethical dilemmas it brings along One of the aims of this book is to demonstrate what can be achieved in approaching science fiction as a kind of imaginary laboratory for experimentation where visions of human or even post human life under various scientific technological or natural conditions that differ from our own situation can be thought through and commented upon Although a scholarly work this book is also designed to be accessible to a general audience that has an interest in science fiction as well as to a broader academic audience interested in ethical questions **Powers**

**of Two** Edwin A. Valentijn, 2021-04-13 Is everything Information This is a tantalizing question which emerges in modern physics life sciences astronomy and in today's information and technology driven society In Powers of Two expert authors undertake a unique expedition in words and images throughout the world and scales of information The story resembles in a way the classic Powers of Ten journeys through space from us to the macro and the micro worlds However by following Powers of Two through the world of information a completely different and timely paradigm unfolds Every power of two 1 2 4 8 tells us a different story starting from the creation of the very first bit at the Big Bang and the evolution of life through 50 years of computational science and finally into deep space describing the information in black holes and even in the entire universe and beyond All this to address one question Is our universe made of information In this book we experience the Information Universe in nature and in our society and how information lies at the very foundation of our understanding of the Universe From the Foreword by Robbert Dijkgraaf This book is in many ways a vastly extended version of Shannon's one page blueprint It carries us all the way to the total information content of the Universe And it bears testimony of how widespread the use of data has become in all aspects of life Information is the connective tissue of the modern sciences Undoubtedly future generations will look back at this time so much enthralled by Big Data and quantum computers as beholden to the information metaphor But that is exactly the value of this book With its crisp descriptions and evocative illustrations it brings the reader into the here and now at the very frontier of scientific research including the excitement and promise of all the outstanding questions and future discoveries Message for the e reader of the book Powers of Two The book has been designed to be read in two page spreads in full screen mode For optimal reader experience in a downloaded pdf file we strongly recommend you use the following settings in Adobe Acrobat Reader Taskbar View Page Display two page view Taskbar View Page Display Show Cover Page in Two Page View Taskbar Preferences Full Screen deselect Fill screen with one page at a time Taskbar View Full screen mode or ctrl L cmd L on a Mac Note for reading the previews on Springer link and on line reading in a browser the full screen two page view only works with these browsers Firefox Taskbar on top of the text at the uppermost right you will see then which is a drop down menu even double pages Fullscreen F11 or Control Cmd F with Mac Edge Taskbar middle Two page view and select show cover page separately [A Year of Fear](#) Bryan
