

MATTER STUDY GUIDE

Everything on earth is made of matter.

Matter is everywhere!

There are 3 states of matter.

Students need to be able to name the three states and give an example of each!

Solid	Liquid	Gas
A solid has its own shape.	Liquids do not have a shape. They take the shape of their container.	Gases have no shape. They fill the container they are in.
<u>Examples:</u> 	<u>Examples:</u> 	<u>Examples:</u> 

Water can be all three states of matter.		
Water as a Solid	Water as a Liquid	Water as a Gas
ICE 	WATER 	WATER VAPOR 

Properties describe matter, how it looks and feels.

Properties can be color, shape, size and texture.

Students should understand matter can change by:

Tearing 	Dissolving 	Melting 	Squeezing

Science Study Guide Matter:

Chemistry (Student) Dennis Englin, 2018-02-08 What is chemistry It is the study of the composition structure and properties of matter It is through an understanding of chemistry that the products that have benefited society were discovered and technologies to sustain the environment were put in place Knowledge taught in this course of how matter changes will give us an insight into the origin of life so we can realize that life could only have been formed by a supernatural act of creation not by a process of change over time High school science course with lab curriculum Lab experiments are included with step by step images for guidance Based on the principle that those who can understand and apply information do much better than those who simply memorize material This course has been taught by Dr Englin for many years with students going on to medical and graduate school He wanted to develop a series of courses that would give students the tools to help them succeed in higher education The comprehensive material has God the Creator as its foundation A teacher guide is available for Chemistry providing this full year science course with a detailed schedule worksheets and tests
