The country asserted the mantle of the continent's largest economy in 2013 following a rebasing exercise. However, its large population means that Nigeria remains a comparatively poor country in per capita terms, with a lower GDP per capita than several of its sub-Saharan neighbors. Following a real GDP contract of 1.5% in 2016, the IMF forecasts that growth will reach 0.8% in 2017 and 1.9% in 2018. While growth began to pick up in the first half of 2017, Nigeria still has much work to do. However, there is the sentiment that the economy has turned a corner and has begun to see a silver lining. Devaluation of the naira, rising inflation, the drop in oil revenues, the slowdown in oil production, and the leader softening of growth. Threatening Dystopias Kasia Paprocki, 2021-12-15 Bangladesh is currently ranked as one of the most

climate vulnerable countries in the world In *Threatening Dystopias* Kasia Paprocki investigates the politics of climate change adaptation throughout the South Asian nation Drawing on ethnographic and archival fieldwork she engages with developers policy makers scientists farmers and rural migrants to show how Bangladeshi and global elites ignore the history of landscape transformation and its attendant political conflicts Paprocki looks at how groups craft economic narratives and strategies that redistribute power and resources away from peasant communities Although these groups claim that increased production of export commodities will reframe the threat of climate change into an opportunity for economic development and growth the reality is not so simple For the country's rural poor these promises ring hollow As development dispossesses the poor from agrarian livelihoods outmigration from peasant communities leads to precarious existences in urban centers And a vision of development in which urbanization and export led growth are both desirable and inevitable is not one the land and its people can sustain *Threatening Dystopias* shows how a powerful rural movement although hampered by an all consuming climate emergency is seeking climate justice in Bangladesh

International Climate Change Law Daniel Bodansky,Jutta Brunnée,Lavanya Rajamani,2017 This textbook by three experts in the field provides a comprehensive overview of international climate change law Climate change is one of the fundamental challenges facing the world today and is the cause of significant international concern In response states have created an international climate regime The treaties that comprise the regime the 1992 United Nations Framework Convention on Climate Change the 1997 Kyoto Protocol and the 2015 Paris Agreement establish a system of governance to address climate change and its impacts This book provides a clear analytical guide to the climate regime as well as other relevant international legal rules The book begins by locating international climate change law within the broader context of international law and international environmental law It considers the evolution of the international climate change regime and the process of law making that has led to it It examines the key provisions of the Framework Convention the Kyoto Protocol and the Paris Agreement It analyses the principles and obligations that underpin the climate regime as well as the elaborate institutional and governance architecture that has been created at successive international conferences to develop commitments and promote transparency and compliance The final two chapters address the polycentric nature of international climate change law as well as the intersections of international climate change law with other areas of international regulation This book is an essential introduction to international climate change law for students scholars and negotiators
