Family-Run Universities in Japan Jeremy Broaden, Roger Goodman, 2020-07-03 Globally private universities enrol one in three of all higher education students In Japan which has the second largest higher education system in the world in terms of overall expenditure almost 80% of all university students attend private institutions According to some estimates up to 40% of these institutions are family businesses in the sense that members of a single family have substantive ownership or control over their operation

This book offers a detailed historical sociological and ethnographic analysis of this important but largely under studied category of private universities as family business. It examines how such universities in Japan have negotiated a period of major demographic decline since the 1990s, their experiments in restructuring and reform, the diverse experiences of those who worked and studied within them, and above all, their unexpected resilience. It argues that this resilience derives from a number of inbuilt strengths of family business which are often overlooked in conventional descriptions of higher education systems and in predictions regarding the capacity of universities to cope with dramatic changes in their operating environment. This book offers a new perspective on recent changes in the Japanese higher education sector and contributes to an emerging literature on private higher education and family business across the world.

**Business and Management Practices in South Asia** Arijit Sikdar, Vijay Pereira, 2018-09-04. This book presents case studies of South Asian companies that have strategic business implications, highlighting the complex interplay of business and social dynamics in South Asia. This region is a wide agglomeration of very different countries that share somewhat common cultures and issues, and yet it is torn apart by religion and politics. There is an abundance of local entrepreneurship, but a widespread institutional void. The book investigates how local companies survive and thrive in this environment and discusses those companies that have withstood the competitive pressure of MNCs, depicting their management and business practices. In today's world, where multinationals are so omnipresent that their management and business practices are considered as the de facto recipe for success, there is a need to have an alternative view that challenges the ubiquitousness of multinational management practices. The case studies in this book focus on the business and management practices of local organizations in South Asia and thus provide that alternative viewpoint of how to achieve success in South Asia. Exposing readers to a local perspective on doing business in South Asia, it is a valuable resource for students and practitioners of management.

**Corporate Governance and Investment Management** Roger M. Barker, Iris H.-Y. Chiu, 2017-12-29. Shareholder engagement with publicly listed companies is often seen as a key means to monitor corporate malpractices. In this book, the authors examine the corporate governance roles of key institutional investors in UK corporate equity, including pension funds, insurance companies, collective investment funds, hedge and private equity funds, and sovereign wealth funds. They argue that institutions' corporate governance roles are an instrument ultimately shaped by

private interests and market forces as well as law and regulatory obligations and that policy makers should not readily make assumptions regarding their effectiveness or their alignment with public interest or social good      *FinTech in Islamic Financial Institutions* M. Kabir Hassan, Mustafa Raza Rabbani, Mamunur Rashid, 2022-11-30 This book explores several challenges facing FinTech in Islamic financial institutions Firstly large banks and financial institutions in countries with updated and innovative technological channels will earn the technology arbitrage from FinTech This size puzzle may create a challenge for Islamic financial institutions that are of smaller size and from technologically less developed countries Secondly while access to FinTech is getting broader day by day usage of FinTech is still limited due to personal and governance related limitations Moreover the level of awareness of the emerging FinTech services i e bitcoin blockchain etc remains extremely poor even among the residents of technologically advanced countries Thirdly use of FinTech by Islamic financial institutions is limited to Islamic banking to users from developed countries among young customers and for a limited number of traditional banking services such as the deposits and payment services Also banks hope to use FinTech to increase the size of a new breed of technology savvy depositors and loan customers to achieve economies of scale which may help stabilize the banking sector Automation in Islamic banks and the participation of Islamic financial institutions in blockchain and bitcoin domains require extensive research from Shariah compliance as well as market and consumer related grounds With all the opportunities and challenges of FinTech promoting inclusion easier loan monitoring and risk of Shariah non compliance this book explores the implications for Islamic financial institutions and will be of interest to scholars researchers and students of Islamic finance and financial technology      Diagnostic and Therapeutic Procedures in Gastroenterology Subbaramiah Sridhar, George Y.
