that the scientific nature of economics in general and Islamic economics in particular rests on the conception of the scientific worldview. With its uniquely comparative approach to mainstream economics, this book facilitates a greater understanding of Islamic economic concepts. Senior undergraduate and graduate students will gain exposure to Islamic perspectives of micro and macroeconomics, money, public finance, and development economics. Additionally, this book will be useful to practitioners seeking a greater comprehension of the nature of Islamic economics. It will also enable policymakers to better understand the mechanism of converting institutions such as public and social policy perspectives.
