Evidence Standards in EU Competition Enforcement Andriani Kalintiri,2019-02-07 What rules or principles govern the assessment of evidence in EU competition enforcement

This book offers for the first time a comprehensive academic study on the topic. Its aim is twofold. Firstly it produces a typology of evidence standards in competition proceedings at the EU level thereby systemising the guidance that is currently dispersed in the case law of the EU Courts. Secondly it examines the applicable evidence rules and principles with a view to better understanding their role in EU competition enforcement. In so doing the book illustrates that evidence standards are not mere technicalities and their significance should not be underestimated. Rigorous and engaging this work provides a much needed analysis of a key question of EU competition enforcement.

The Morphosyntax of Negative Markers Karen De Clercq, 2020-06-08. This book applies the tools of nanosyntax to the natural language phenomenon of negation. Most work on negation is concerned with the study of sentence negation while low scope negation or constituent negation is hardly ever systematically discussed in the literature. The present book aims to fill that gap by investigating scopally different negative markers in a sample of 23 typologically diverse languages. A four-way classification of negative markers is argued for and it is shown how meaningful syncretism patterns arise across those four groups of

negative markers in the language sample investigated The syncretisms are meaningful in that they track the natural semantic scope of negation and provide support to the idea that morphology is not arbitrary but points to submorphemic structure Consequently this study leads to a decomposition of the negative morpheme into five privative features Tense Focus Classification Quantity and Negation proper Finally the book argues that sentence constituent and lexical negation can all be treated in the same module of the grammar i e syntax

Socio-Metabolic Perspectives on the Sustainability of Local Food Systems Eva Fraňková, Willi Haas, Simron J. Singh, 2018-01-09 This book delves into diverse local food systems and critically assesses their ecological and societal benefits and trade offs their limits and opportunities for improving sustainability of food production and framework conditions which either hinder or promote their development More and more people with gradually meat heavier diets will demand growth in food production whilst our increasingly industrialized and globalized agri food system has already caused serious sustainability problems in the past This calls for a change in the way we produce distribute and consume food A re emerging debate on food security and food sovereignty seems to support this quest But what are the promising alternatives to mainstream developments Such a discussion regarding sustainability of local food systems requires a sound systemic understanding and thus invites a socio metabolic reading of local cases by analyzing the nexus between material and energy flows as well as land and time use This approach is needed to complement the so far mostly qualitatively based local food studies Applying socio metabolic approaches to local food systems fosters a better understanding of promises and pitfalls for sustainable pathways in the future
