book provides a regional overview of the current status of all the castles surveyed by MacGibbon and Ross followed by a thematic exploration of those that have been lost those that have been transformed and those at risk of collapse before posing questions about what the future holds for the castles of Scotland **Scotland's Castles** Janet R. 13th century to those of the present day Ever since its medieval origins the concept of the castle has undergone constant changes with the tall tower house being superseded in the 17th century by the classical house and in the 18th century by a fashionable building type designed by major architects such as Robert Adam While Scotland's Castle Culture in many ways marched with European fashion much was distinctively Scottish as seen in the reluctance to abandon castles as residences and then in the power of the castle's resurgence as a building type during the years when Scotland was one of the most ferociously modernising countries in the world the Victorian age At this time there were few modern building types that were not candidates for castellation not just houses but also farms lighthouses banks schools and even railway stations Lastly the book takes us to the present where most castles of whatever century are now protected for their value as national heritage The drama and diversity of this story is reflected in the book's structure five chapters covering the main chronological phases of Castle Culture followed by ten individual case studies of representative examples from medieval Bothwell to Iain Begg's late 20th century Raven's Craig
