Scour Manual Hoffman:

Scour Manual G.J.C.M. Hoffmans, 2017-11-01 The mechanisms and behaviour of the scour process is a challenging subject and one which is expertly dealt with in this informative illustrated volume Specifically this book addresses issues relating to computing and controlling the scour process near hydraulic structures and pays special attention to the time dependent character of the scour processes and the predictability of scour relations Providing information on the latest developments in scouring this text is intended for practising hydraulic engineers *Sonar Scour Monitor* James Douglas Schall, National Cooperative Highway Research Program, 1997 **Bridge Scour** Bruce W. Melville, Stephen E. Coleman, 2000 A comprehensive state of the art treatment of scour and bridge foundations both a handy reference text and a manual for the practicing bridge designer Publisher **Coastal Engineering 2006** Jane McKee Smith, 2007

Megaflooding on Earth and Mars Devon M. Burr, Paul A. Carling, Victor R. Baker, 2009-09-24 Megaflooding is the sudden discharge of exceptional volumes of water Megafoods have significantly altered the terrain of Earth and Mars and may have acted as triggers for climate change on these planets Recently research into megaflooding has made important advances on Earth real time measurements of contemporary floods in Iceland complement research into older and larger terrestrial floods while on Mars terabytes of data from several spacecraft orbiting that planet are dramatically revising our view of flooding there Beginning with a historical overview of flood science the book presents sections on morphology and mechanisms flood sedimentology and modelling each illustrated with examples from Earth and Mars By juxtaposing terrestrial and Martian research this volume creates a unique synthesis to further our understanding of these enormous paleoflood events It is an invaluable reference for researchers and students of hydrology geomorphology sedimentology and planetary science as well as environmental and hydraulic engineers Technical Reports Awareness Circular : TRAC. , 1989-11 Research on Design for Prevention of Ditch Erosion on Virginia Highways , 1999 Roadside ditch erosion has been problematic on Virginia highways VDOT through the Virginia Transportation Research Council requested that roadside ditch erosion be investigated by means of a research project Virginia Tech was selected to conduct this study In support of this research design guidance documents were surveyed to learn the current established policy and procedures for soil data collection and reporting and the design practice for hydrologic and hydraulic analyses of roadside ditches Site visits to each of Virginia's nine construction districts were made to interview district personnel about their personal experience with roadside ditch design performance and erosion failures Current ditch design practices in nine other states were investigated through the collection and survey of state drainage manuals and phone interviews with DOT personnel Finally an extensive review of current literature was performed with the intent of investigating current research on ditch erosion and erosion control Results of the research indicate that three major factors are contributing to the occurrence of erosion in roadside ditches They include 1 insufficient soil information collected on road projects and reported in unusable formats for the hydraulic designers 2 overuse of default

values and criteria in hydraulic design and 3 geographical and management issues not currently encompassed by current VDOT ditch design policies and procedures Recommendations directed at these factors are provided along with tables presenting updated correlations between site specific conditions and hydraulic parameters for design **Comptes Rendus** International Association for Hydraulic Research.
