Implementing National Qualifications Frameworks Across Five Continents Michael Young, Stephanie Allais, 2016-04-08

This book assesses the impact and implementation of national qualifications frameworks in sixteen different countries. It presents two major lessons for policy makers thinking of introducing a National Qualifications Framework (NQF). First, that an NQF is only a way of framing existing provision; it cannot on its own lead to the acquisition of skills or knowledge. Second, as an attempt to standardize learning, something that is only to a limited extent standardizable, NQFs have disadvantages as well as advantages. The research was funded by the International Labour Organization (ILO) and the European Training Foundation (ETF) and partly as a result of the ILO ETF Report. The Editors were asked by the World Bank to help them in advising the government of India on introducing a NQF for vocational qualifications. Building on the findings of the report, the editors of this book presented an NQF implementation strategy to the Government of India on behalf of the World Bank. It laid out the steps and stages that would be involved and took account of the earlier experiences of introducing an NQF. Although this strategy was prepared specifically for the Government of India, others who have read it felt it deserved wider circulation. The report has therefore been included in this volume. Since this research was undertaken, the number of countries, especially developing countries, implementing or introducing a NQF has continued to increase. This book will be of interest to policy makers and researchers. This book was originally published as a special issue of the *Journal of Education and Work*. Pain E-Book Hubert van Griensven, Jenny Strong, Anita M. Unruh, 2013-12-06. The highly anticipated new edition of *Pain*, a textbook for health professionals, previous subtitle *a textbook for therapists*, has undergone a major rewrite in order to reflect the rapid developments in the field of pain management. It highlights an effective and evidence-based method providing the theoretical basis to help with the assessment and management of persistent pain while also discussing in depth a range of specific approaches. *Pain*, a textbook for health professionals, is written emphatically from a biopsychosocial perspective. In order to set the scene, the introductory section includes chapters on the patient's voice and social determinants of pain. This ensures that the deeply personal and social aspects of pain are not lost among the more technical and biological commentary. These aspects provide an overall context and are revisited in chapters on participation of life roles, work, rehabilitation, and psychology. The basic science section includes key chapters on the psychology, neuroanatomy, and neurophysiology of pain. This provides a basis for subsequent chapters on specific approaches such as pharmacology, physical therapy, and complementary medicine. *Pain* in specific patient groups, including children, the elderly, and those with cancer, are dealt with in separate chapters, as are pain problems such as complex regional pain syndrome and chronic spinal pain. Although the emphasis of the book is on long-term pain, acute pain is discussed as a possible precursor and determinant of chronicity. Patient-centred approach to care advocates listening to the

patient's voice Covers social determinants of pain Guides the reader from pain psychology to the practical application of psychological interventions Learning aids chapter objectives reflective exercises case examples and revision questions Emphasizes an evidence based perspective Written by an international team of experts topics such as pain in children and the elderly pain education for professionals disability and medico legal aspects expanded focus on complex regional pain syndrome acupuncture and psychology improved layout for a better learning and studying experience **Widening Access to Higher Education in the UK: Developments and Approaches Using Credit Accumulation and Transfer** Wayne Turnbull, Harvey Woolf, 2022-03-23 Credit is intertwined with higher education around the world and this book introduces and analyses the long term effects that this connection brings Structured in three parts the book is grounded in experience practitioner research and detailed policy analysis The greater availability of credit in higher education is closely tied to policies of widening access and this book addresses current issues including the consequences of Brexit standards in higher education and the management of mobile student learning The contributors to this book Explore the development and integration of credit within institutional policy Outline the systems of student progression and achievement including methods of assessment and measurement Examine the official account of credit widening access and curriculum in the UK Analyse how credit can facilitate flexibility in curriculum design The book is relevant to anyone engaged in educational development academic policy and learner support The breadth of contributions from across the UK ensures the variation in policies is mapped and charts the implications for learners Rarely does a text come along which tackles challenging technical aspects of higher education and presents them in an accessible and creative way Maureen McLaughlin Academic Registrar Northumbria University UK This is a scholarly and timely analysis of the development of systems for recognising academic credit within the context of widening access to higher education Dr Marie Stowell Director of Quality and Educational Development University of Worcester UK This book is required reading for anyone interested in the future of higher education in a rapidly changing world Dr Andy W Smith Quality Assurance Agency for Higher Education It is hard to find enough words of praise for this excellent collection of essays Herman de Leeuw Executive Director and Founder Groningen Declaration Network Wayne Turnbull was Head of Academic Policy and is now a historian at Liverpool John Moores University UK Harvey Woolf was Head of Academic Standards at the University of Wolverhampton UK He is a founder member of the Student Assessment and Classification Working Group [International Handbook of Education for the Changing World of Work](#) Rupert Maclean, David Wilson, 2009-06-29 The aim of this Handbook is to review the developments that have occurred in Technical and vocational education and training TVET and that may help improve the field The Handbook provides information on TVET models that occur in different parts of the world reflects best and innovative practice and wherever possible uses case studies as examples The 220 authors are representative of the various regions of the world and major international organisations involved in TVET This volume presents the work of established researchers

Kompetenzen anerkennen Bertelsmann Stiftung, 2015-11-05. In Deutschland und auch in anderen europäischen Staaten wird darüber diskutiert, wie beruflich relevantes Erfahrungswissen besser erfasst und sichtbar gemacht werden kann. Formale Abschlüsse sichern bisher die Teilhabe am Arbeitsleben. Menschen lernen jedoch auch informell in Beruf und Freizeit sowie nonformal in der Weiterbildung, also kontinuierlich und über formale Bildungseinrichtungen hinaus. Diese Kompetenzen gelten bisher wenig, obwohl sie für die berufliche Handlungsfähigkeit in vielen Fällen bedeutender sein können als formell zertifiziertes Wissen und Können. Vor allem formal geringqualifizierte und Zuwanderer können profitieren. Ein Anerkennungssystem hilft besonders ihnen, aber auch den anderen Erwerbstätigen sowie den Unternehmen, wenn es darum geht, alle berufsrelevanten Kompetenzen verwertbar zu machen. In einigen Ländern Europas gibt es bereits Verfahren mit Zertifikaten, die auf dem Arbeitsmarkt anerkannt sind. Anhand von sieben europäischen Ländern wird ein Überblick gegeben, wie die Anerkennung von Kompetenzen in Bezug auf Rechtsgrundlagen, Instrumente und Verfahren, aber auch hinsichtlich Finanzierung, Institutionalisierung und Supportstrukturen funktionieren kann. Die in diesem Buch illustrierten Erfahrungen anderer Länder geben Deutschland auf dem Weg zu einem verbindlichen Anerkennungssystem wichtige Hinweise für wirksame Lösungen.

The Module & Programme Development Handbook Jennifer A. Moon, 2002. Modular course structures are now the norm in higher education. This book provides a step by step handbook on the processes involved in the design of modules and programmes, showing how to successfully develop courses that meet quality assessment and other key criteria. A comprehensive, concise and refreshingly straightforward guide, this book is a unique practical resource covering the entire process of developing a module. It gives a clear overview of various elements and enables readers to develop successful structures for their own students. The handbook stresses the importance of design.
