Research Writing uses a reverse engineering approach to writing developed from extensive work with STEMM researchers at Imperial College London This approach unpacks current models of STEMM research writing and helps writers to generate the writing tools needed to operate those models effectively in their own field The reverse engineering approach also ensures that writers develop future proof strategies that will evolve alongside the coming changes in research communication

platforms The Second Edition has been extensively revised and updated to represent current practice and focuses on the writing needs of both early stage doctoral STEMM researchers and experienced professional researchers at the highest level whether or not they are native speakers of English The book retains the practical user friendly format of the First Edition and now contains seven units that deal separately with the components of written STEMM research communication Introduction

Methods Results Discussion Conclusion Abstract and Title as well as extensive FAQ responses and a new Checklist and Tips section Each unit analyses extracts from recent published STEMM journal papers to enable researchers to discover not only

what to write but crucially how to write it The global nature of science research requires fast accurate communication of highly complex information that can be understood by all participants Like the First Edition the Second Edition is intended as a fast do it yourself guide to make both the process and the product of STEMM research writing more effective
