Vermeersch, 2016-04-30 The king and ministers superior and inferior move with ritual and refinement When the king goes on an inspection tour everyone has the correct ceremonial attributes and the divine flag troops gallop in front while armored soldiers block the road The soldiers of the Six Divisions all hold their attributes Although it is not completely in uniformity with classic rites compared with other barbarians it is splendid to behold This is why Confucius thought it would not be a shame to reside here And is not moreover Kija s country a close relative of the hallowed dynasty So observed the Song envoy Xu Jing in the official report of his 1123 visit to Korea a rare eyewitness account of Kory ŏ society in its prime Officially the purpose of Xu Jing s visit was to condole the new king Injong on the death of his father and present him with a letter of investiture unofficially he was tasked with persuading Injong to align with Song China against the newly emergent Jin dynasty Although famous for its celadon and Buddhist paintings the Kory ŏ period is still very much terra incognita in world history because of the lack of translated source materials The present work the first fully annotated complete translation of a key source text on Kory ŏ fills this gap Xu Jing spent a little more than a month in the Kory ŏ capital Kaes ŏng but he was a meticulous chronicler compiling a veritable handbook on Kory ŏ that is full of fascinating details found nowhere else on daily life history customs and manners buildings the military food among others However Xu Jing was not unbiased in his observations and supplemented his work with unreliable information from earlier chronicles a fact often ignored in previous studies of the Illustrated Account In a substantial introduction to his translation Sem Vermeersch not only places this important work in its historical context but also reveals both the sources used by the author and the merits and limits of his observations allowing historians of medieval Korea to make fuller use of this singular primary source **Secure Voice**

Processing Systems against Malicious Voice Attacks Kun Sun, Shu Wang, 2023-10-30 This book provides readers with the basic understanding regarding the threats to the voice processing systems the state of the art defense methods as well as the current research results on securing voice processing systems It also introduces three mechanisms to secure the voice processing systems against malicious voice attacks under different scenarios by utilizing time domain signal waves frequency domain spectrum features and acoustic physical attributes First the authors uncover the modulated replay attack which uses an inverse filter to compensate for the spectrum distortion caused by the replay attacks to bypass the existing spectrum

based defenses The authors also provide an effective defense method that utilizes both the time domain artifacts and frequency domain distortion to detect the modulated replay attacks Second the book introduces a secure automatic speech recognition system for driverless car to defeat adversarial voice command attacks launched from car loudspeakers smartphones and passengers Third it provides an acoustic compensation system design to reduce the effects from the spectrum reduction attacks by the audio spectrum compensation and acoustic propagation principle Finally the authors conclude with their research effort on defeating the malicious voice attacks and provide insights into more secure voice processing systems This book is intended for security researchers computer scientists and electrical engineers who are interested in the research areas of biometrics speech signal processing IoT security and audio security Advanced level students who are studying these topics will benefit from this book as well
