This revised edition includes updated measure descriptions, new measure variants, and research and newly selected measures particularly appropriate to the domain of discussion. As a clinical tool, this book describes how, when, and to what purpose measures are used; points out practical issues to consider in choosing a measure for clinical use; addresses limitations in the use of measures, including ethnic, cultural, and socioeconomic factors that influence their interpretation. Use of this special resource is further enhanced by a CD-ROM containing the full text of more than 150 of these measures, an invaluable aid for reference and clinical decision making.

Handbook of Cross-Cultural and Multicultural Personality Assessment Richard H. Dana, 2000-02-01. Throughout the world, as in the United States, psychologists are increasingly being called upon to evaluate clients whose backgrounds differ from their own. It has long been recognized that standard personality and psychopathology assessment instruments carry cultural biases, and in recent years efforts to correct these biases have accelerated. The *Handbook of Cross-Cultural and Multicultural Personality Assessment* brings together researchers and practitioners from 12 countries with diverse ethnic and racial identities and training to present state-of-the-art knowledge about how best to minimize cultural biases in the assessment of personality and psychopathology. They consider research methodology, the design and construction of standard, objective, and projective tests, the use of measures of acculturation, racial identity, and culture-specific tests, the social etiquette of service delivery, and the interpretation of test data for clinical diagnosis. Ranging widely through all the relevant issues, they share a common collective vision of how culturally competent services should be delivered to clients. The *Handbook* offers the first comprehensive view of a consistent approach to cultural competence in assessment, a necessary precursor of effective intervention. It will become an indispensable reference for all those whose practice or research involves individuals with different ethnic and racial identities.

The Oxford Handbook of Clinical Psychology David H. Barlow, 2011. The exponential growth of clinical psychology since the late 1960s can be measured in part by the extensive, perhaps exhaustive, literature on the subject. This proliferation of writing has continued into the new century, and the field has come to be defined as much by its many topics as its many voices. The *Oxford Handbook of Clinical Psychology* synthesizes these decades of literature in one extraordinary volume. Comprising chapters from the foremost scholars in clinical psychology, the handbook

provides even and authoritative coverage of the research practice and policy factors that combine to form today's clinical psychology landscape. In addition to core sections on topics such as training, assessment, diagnosis, and intervention, the handbook includes valuable chapters devoted to new and emerging issues in the clinical field, including health care reforms, cultural factors, and technological innovations and challenges. Each chapter offers a review of the most pertinent literature, outlining current issues and identifying possibilities for future research. Featuring two chapters by Editor David H. Barlow, one on changes during his own 40-year odyssey in the field, the other projecting ten themes for the future of clinical psychology. The Oxford Handbook of Clinical Psychology is a landmark publication that is sure to serve as the field's benchmark reference publication for years to come. It is an essential resource for students, clinicians, and researchers across the ever-growing clinical psychology community.

Handbook of Primary Care Psychology Leonard J. Haas, 2004-08-19 This handbook is designed to provide authoritative information to the psychologist working in primary care settings and to those seeking to learn about clinical issues in such settings. Scholarly and at the same time practical, this volume offers both the clinician and the researcher a wide-ranging look at the contexts in which psychological services become of paramount importance to the health of the patient. The handbook will cover the prevalent psychological conditions in the primary care setting: depression, anxiety, somatization, eating disorders, and alcoholism; illnesses in which psychological disorders play a major role, such as heart disease, diabetes, cancer, pain management, headache, asthma, low back pain, sleep disorders, among others; and issues of concern to psychologists treating children (ADHD, disciplinary problems, etc.), treating women (abuse, infertility, menopause, sexual dysfunction), treating men (workaholic, alcoholism, sexual dysfunction), and treating the older patient (death and dying, cognitive impairment, late-life depression). Other important topics include psychological side effects of common medications, resistance to treatment, spiritual concerns in the treatment of patients, cultural differences in healing, suicide, AIDS, prevention of disease, and many others. Leonard Haas is a noted authority in the area of primary care psychology and has recruited expert contributors for the 41 chapters and two appendices that make up this definitive handbook for a growing and important subspecialty in clinical psychology. The work may also be used in graduate courses in health psychology.
