Public Policy in International Economic Law Diane Desierto, 2015-02-19 States reject inequality when they choose to ratify the International Covenant on Economic Social and Cultural Rights ICESCR but to date the ICESCR has not yet figured prominently in the policy calculus behind States international economic decisions This book responds to the modern challenge of operationalizing the ICESCR particularly in the context of States decisions within international trade finance and investment Differentiating between public policy mechanisms and institutional functional mandates in the international trade finance and investment systems this book shows legal and policy gateways for States to feasibly translate their fundamental duties to respect protect and fulfil economic social and cultural rights into their trade finance and investment commitments agreements and contracts It approaches the problem of harmonizing social protection objectives under the ICESCR with a State s international economic treaty obligations from the designing and interpreting international treaty texts up to the institutional monitoring and empirical analysis of ICESCR compliance In examining public policy options the book takes into account around five decades of States implementation of social protection commitments under the ICESCR its normative evolution through the UN Committee on Economic Social and Cultural Rights and the Committee s expanded fact finding and adjudicative competences under the Optional Protocol to the ICESCR as well as the critical dialectical and deliberative roles of diverse functional interpretive communities within international trade finance and investment law Ultimately the book shoes how States ICESCR commitments operate as the normative foundation of their trade finance and investment decisions

Transformation Index BTI 2014 Bertelsmann Stiftung, 2014-01-01 Managing the peaceful transition of authoritarian states to democracy and a market economic system represents a tremendous challenge Whether it comes to reconstituting the coherency of the state following armed conflict expanding participation rights and the rule of law in emerging democracies overcoming corrupt structures fighting poverty and inequality or establishing clear rules for stable market economic competition the requirements are enormous and the pressure on responsible leaders is intense After all the quality of political management makes an essential contribution to the success or failure of transformation processes The Bertelsmann Stiftung s Transformation Index BTI thus systematically places political decision makers steering capability at the heart of its analysis and as a result is the only index in the world that measures and compares the quality of governance with self collected data This is done in the firm conviction that the ongoing comparative study of transformation processes is invaluable for the successful design of reforms and holds enormous global potential to learn from different political strategies for steering change even though diverse traditions power configurations resources and cultures necessarily make each transformation process unique The BTI measures and compares transition processes in 129 transformation countries with

data collected between 2011 and 2013 and establishes their global rating based on detailed country reports Now in its sixth edition it offers the opportunity to understand long term trends and global developments through the analysis of time series data The spotlight on current developments is thus complemented by a decade of data that captures the most varied transformation processes and puts into perspective recent progress and setbacks on the way to democracy and a market economy
