Evaluate Teen Driver-training Programs Tammy E. Trimble, Stephanie Baker, William A. Schaudt, Taryn Schrader, 2013

The goal of this research project was to develop a methodology to assist the Wisconsin Department of Transportation WisDOT in the evaluation of effectiveness of teen driver education programs over the short and long terms. The research effort was divided into two phases. Phase I focused on the development of an evaluative methodology that was based upon a review of the relevant literature and Wisconsin specific policies and available data sources. This review culminated in a program assessment tool focused on four contributing areas of teen driver training and education: 1. Guardian Involvement, 2. Driver Education and Training Curricula Requirements, 3. GDL Coordination, and 4. Instructor Qualifications. The proposed methodology was presented to the Project Oversight Committee and was validated through two rounds of pilot testing using materials provided by programs and schools under the oversight of both WisDOT and the Wisconsin Department of Public Instruction. The resulting methodology informed the Phase II implementation plan recommendations. Work products included within this report are an annotated bibliography, a knowledge base documenting best practices and Wisconsin specific data sources, a methodology that may be used to analyze and evaluate the effectiveness of driver training programs as they relate to the demonstrated safety and behavior of teen drivers in Wisconsin, and a three phase implementation plan.
