 Unique* Lucien Karpik, 2021-11-09 In this landmark work of economic sociology Lucien Karpik introduces the theory and
 practical tools needed to analyze markets for singularities Singularities are goods and services that cannot be studied by
 standard methods because they are multidimensional incommensurable and of uncertain quality Examples include movies
 novels music artwork fine wine lawyers and doctors *Valuing the Unique* provides a theoretical framework to explain this
 important class of products and markets that for so long have eluded neoclassical economics With this innovative theory
 called the economics of singularities Karpik shows that because of the uncertainty and the highly subjective valuation of
 singularities these markets are necessarily equipped with what he calls judgment devices such as labels brands guides critics
 and rankings which provide consumers with the credible knowledge needed to make reasonable choices He explains why
 these markets are characterized by the primacy of competition by qualities over competition by prices and he identifies the
 conditions under which singularities are constructed or are in danger of losing their uniqueness After demonstrating how
 combinations of the numerous and multiform judgment devices can be used to identify different market models Karpik
 applies his analytical tools to the functioning of a large number of actual markets including fine wines movies luxury goods
 pop music and legal services *Reference Books Bulletin, 1993-1994* Sandy Whiteley, 1994 *Cheers* , 1994 *Food &
