Parallel Processing and Applied Mathematics Roman Wyrzykowski, 2006-05-17 This volume comprises the proceedings of the 6th International Conference on Parallel Processing and Applied Mathematics PPAM 2005 which was held in Poznan the industrial academic and cultural center in the western part of Poland during September 11 14 2005 *High Performance Computing Systems and Applications* Robert D. Kent, Todd W. Sands, 2012-12-06 High Performance Computing Systems and Applications contains fully refereed papers from the 15th Annual Symposium on High Performance Computing These papers cover both fundamental and applied topics in HPC parallel algorithms distributed systems and architectures distributed memory and performance high level applications tools and solvers numerical methods and simulation advanced computing systems and the emerging area of computational grids High Performance Computing Systems and Applications is suitable as a secondary text for graduate level courses and as a reference for researchers and practitioners in industry

Input/Output Intensive Massively Parallel Computing Peter Brezany, 1997-04-09 Massively parallel processing is currently the most promising answer to the quest for increased computer performance This has resulted in the development of new programming languages and programming environments and has stimulated the design and production of massively parallel supercomputers The efficiency of concurrent computation and input output essentially depends on the proper utilization of specific architectural features of the underlying hardware This book focuses on development of runtime systems supporting execution of parallel code and on supercompilers automatically parallelizing code written in a sequential language Fortran has been chosen for the presentation of the material because of its dominant role in high performance programming for scientific and engineering applications Scientific and Technical Aerospace Reports, 1995 **Energy Research Abstracts**, 1990 *Image Understanding Workshop* United States.
