Catheter-Based Cardiovascular Interventions Peter Lanzer, 2012-08-01 Operator skills and in particular decision making and strategic skills are the most critical factor for the outcome of catheter based cardiovascular interventions. Currently such skills are commonly developed by the empirical trial and error method only. In this textbook for the first time an explicit teaching training and learning approach is set out that will enable interventional operators whether cardiologists, vascular surgeons, vascular specialists or radiologists to learn about and to develop the cognitive skills required in order to achieve consistent expert level catheter based interventions. It is anticipated that adoption of this approach will allow catheter based interventions to become a domain of excellence with rapid transfer of knowledge, steep learning curves and highly efficient acquisition of complex skills by individual operators, all of which are essential to meet successfully the challenges of modern cardiovascular care.
