Human Vision and The Night Sky Michael Borgia, 2006-12-11 For years the images have blazed through your imagination They are the magnificent full color photographs returned by the Hubble Space Telescope and its sister Great Observatories of the grand depths of the cosmos From the pillars of creation considered to be Hubble's signature image to the incomprehensible depths of the Hubble Deep Fields to the intricate details imaged in the surface and cloud tops of Mars or Jupiter the power of the Hubble Telescope to turn on the public to science is unparalleled in the history of modern culture They also have spurred new telescope sales to unimagined highs And after years of watching the heavens through the eyes of NASA you've decided it's time to see it for yourself You make the trip to the department store and pick up that shiny new 500 telescope set it up and soon you're in business Unfortunately the high initial expectations usually give way to disappointment Instead of seeing the magnificent swirling clouds of gas in the Orion Nebula you see a pale green gray cloud with a couple of nondescript stars lurking nearby The swirling red yellow and brown storms of Jupiter are nowhere to be seen only varying shades of gray in the planet's cloud bands assuming you can see bands at all And Mars After waiting all night for the red planet to rise up over the morning horizon you are greeted by nothing more than a featureless reddish orange dot

Provisional Cities Renata Tysczuk, 2017-11-02 This book considers the provisional nature of cities in relation to the Anthropocene the proposed geological epoch of human induced changes to the Earth system It charts an environmental history of curfews admonitions and alarms about dwelling on Earth Provisional cities are explored as exemplary sites for thinking about living in this unsettled time Each chapter focuses on cities settlements or proxy urbanisations including past disaster zones remote outposts in the present and future urban fossils The book explores the dynamic changing and contradictory relationship between architecture and the global environmental crisis and looks at how to reposition architectural and urban practice in relation to wider intellectual environmental political and cultural shifts The book argues that these rounder and richer accounts can better equip humanity to think through questions of vulnerability responsibility and opportunity that are presented by immense processes of planetary change These are cautionary tales for the Anthropocene Central to this project is the proposition that living with uncertainty requires that architecture is reframed as a provisional practice This book would be beneficial to students and academics working in architecture geography planning and environmental humanities as well as professionals working to shape the future of cities

The Sky With Diamonds Malcolm Macdonald, 2013-10-10 It is the 1920s an age of innovation and daring in transportation both on the road and in the air At the forefront of motor car development is Somerville's to own a Somerville bodied Rolls Royce is every man's dream But when George Somerville has an accident that leaves him paralysed the future of the firm looks uncertain George has no sons old enough to manage the firm He does however have a wife Defying general skepticism and her own doubts Julia gradually takes control warding off

takeover attempts with breathtaking skill and cunning In Eliot Baring an American employee and a brilliant airplane engineer she sees a new future for Somerville s and perhaps for herself Together they take Somerville s into the skies where competition is fierce and enemies common But the skies darken as fascism spreads across Europe and Julia s conscience becomes ever more important in Somerville s future Beset on all sides deserted by her colleagues and lovers her future looks bleak until help comes from the most unexpected quarter
