Promoting the Emotional and Behavioral Success of Youths Sergio V. Delgado, Ernest V. Pedapati, Jeffrey R.

Strawn, 2022-02-11 Clinicians often have difficulty helping the parents of youth with emotional and behavioral difficulties and fail to recognize that often it is the youth's cognitive and learning weaknesses that drive their maladaptive behaviors. This book aims to help clinicians further understand the roots of youth's maladaptive behaviors. It also addresses the impact of youth's varied cognitive abilities on their behaviors and problems with self-esteem, particularly in youth that do not meet the diagnostic criteria for a formal learning disability. While many clinicians view learning deficits as impairments in specific academic skills, these deficits go beyond varied learning abilities and often experience difficulties in emotional, social, and behavioral functioning. These impairments vary from child to child, and it is crucial to develop practical interventions for improved self-esteem and emotional success. Varied learning abilities reflect a neurodevelopmental problem in youth that can lead to difficulties with their emotional, social, and academic functioning and limit their intellectual potential. There are often treatment impasses when a youth's behavioral problems do not improve with traditional forms of psychotherapy and medication. The practical individualized interventions recommended in this book will 1) decrease conflict in day-to-day interactions between youth and parents, 2) improve self-esteem, and 3) help to achieve realistic social, emotional, and academic goals. The text will help clinicians determine which maladaptive behaviors are a result of cognitive deficits and not symptoms of a disease-based mental disorder. Written by experts in the field, *Promoting the Emotional and Behavioral Success of Youths* reviews appropriate interventions in the context of the public health strategies that address the prevention of secondary socio-economic aspects as a result of cognitive weaknesses such as realistic educational needs, career, and employment choices. Clinicians will be able to use this book to develop best-fit multimodal interventions to help parents of youth develop adaptive behaviors.

Neural Circuitry of Behavioral Flexibility: Dopamine and Related Systems Gregory B.

Bissonette, Matthew R. Roesch, 2016-03-22 Decades of research have identified a role for dopamine neurotransmission in prefrontal cortical function and flexible cognition. Abnormal dopamine neurotransmission underlies many cases of cognitive dysfunction. New techniques using optogenetics have allowed for ever more precise functional segregation of areas within the prefrontal cortex which underlie separate cognitive functions. Learning theory predictions have provided a very useful framework for interpreting the neural activity of dopamine neurons, yet even dopamine neurons present a range of responses from salience to prediction error signaling. The functions of areas like the Lateral Habenula have been recently described, and its role, presumed to be substantial, is largely unknown. Many other neural systems interact with the dopamine system, like cortical GABAergic interneurons, making it critical to understand those systems and their interactions with dopamine in order to fully appreciate dopamine's role in flexible behavior. Advances in human clinical research, like exome sequencing, are driving experimental hypotheses which will lead to fruitful new research directions, but how do or should these clinical findings inform basic research? Following new information from these techniques, we may begin to develop a fresh

understanding of human disease states which will inform novel treatment possibilities However we need an operational framework with which to interpret these new findings Therefore the purpose of this Research Topic is to integrate what we know of dopamine the prefrontal cortex and flexible behavior into a clear framework which will illuminate clear testable directions for future research WAIMH Handbook of Infant and Early Childhood Mental Health Joy D.
