Handbook of Research on Developing Sustainable Value in Economics, Finance, and Marketing Akkucuk, Ulas, 2014-10-31 In an age of rising environmental concerns it has become necessary for businesses to pay special attention to the resources they are consuming and the long term effects of the products they are creating These concerns coupled with the current global economic crisis demand a solution that includes not only business but politics ecology and culture as well The Handbook of Research on Developing Sustainable Value in Economics Finance and Marketing provides the latest empirical research findings on how sustainable development can work not just for organizations but for the global economy as a whole This book is an essential reference source for professionals and researchers in various fields including economics finance marketing operations management communication sciences sociology and information technology **Catalog of Copyright Entries. Third Series** Library of Congress. Copyright Office, 1967 Includes Part 1 Number 1 Books and Pamphlets Including Serials and Contributions to Periodicals January June Moody's International Manual, 1995 *Class Definitions* Michelle M. Tokarczyk, 2008 This book examines how working class status intersects with other identities such as gender sexual orientation ethnicity and region in the lives and works of the three authors named Its introduction discusses widely recognized definitions of the working class and common traits of working class literature These include representations of working class lives providing a voice for the voiceless representation of suffering caused by class inequities and the use of working class dialect Working class women's literature in particular reclaims women's bodies from overwork sexual abuse or degradation brought on by poverty The text then devotes a chapter to each author's life and writing examining the distinct critical features of each writer's work as well as the specific ethnic regional and personal dynamics that inflect her working class experiences *Class Definitions* includes unpublished interviews with each of the authors During the past decade working class literature has been recognized in national conferences as well as in anthologies Yet there are stubborn tendencies to identify the working class with white male laborers and to see ethnic and working class writing as distinct camps This book argues for recognition of the varieties of working class experience through its examination of three diverse authors and their texts It highlights the specific working class experience of each author and thus avoids essentializing working class women's lives and writings Maxine Hong Kingston's writing was informed by her years in the anti Vietnam War movement as well as by her working class background Her recent work has reflected writing workshops with veterans Sandra Cisneros's work represents women struggling with the Chicano code of machismo and the legend of La Malinche Dorothy Allison has talked about her need to write against the stereotypes of poor Southerners as well

as to be out about her lesbianism Working class women s literature is not propaganda or a blueprint but rather might be compared to a tapestry as rich and multifaceted as the American multicultural landscape itself Class Definitions is informed by feminist working class and literary theory but written in a highly accessible and engaging prose It will appeal to both scholars and the wide reading public that Kingston Cisneros and Allison each enjoy Ultimately the book provides a deeper understanding of each author s work and argues for a more nuanced appreciation of working class women s literature In lives characterized by material deprivation and social marginality literature provides a glimmer of hope For each of these writers imaginative writing is not only a vivid representation of inequalities but also an inspiring glimpse into possibilities
