Unit 1 PART A Pharmacology at Work 1. What are the requirements for dispensing schedule II and III prescriptions? Name some examples of each. Schedule II can only be prescribed in person, unless it's an emergency. Schedule II's dispensing is very strict since it has a high possibility of abuse. An example of schedule II would be morphine, fentanyl and hydromorphone. Schedule III has a moderate potential for abuse. Examples of schedule III are anabolic steroids and codeine with aspirin or acetaminophen. Internet Research 1. Research the career options for trained pharmacy technicians.
