

Waves Interference Remote Lab 2 Interference

(This lesson is designed for a student working remotely.)

This lab uses the [Waves Interference](https://phet.colorado.edu/en/simulations/interference) simulation from PhET Interactive Simulations at University of Colorado Boulder, under the CC-BY 4.0 license.

<https://phet.colorado.edu/en/simulations/interference>

Note about prior learning: Students should have completed [Waves on a String Remote Lab](#) and [Waves Interference Remote Lab 1](#) (or [Waves Intro Remote Lab](#)) or lessons with similar learning goals.

Learning Goals: Students will be able to:

- Create an interference pattern with two sources, and determine the ways to change the pattern.
- Find points of constructive and destructive interference by eye and by using the detectors.
- Put up a barrier to see how the waves move through one or two slits. What sort of pattern do the slits create? How can you change this pattern?

Develop your understanding: Open the [Interference](#) screen, then explore to make water waves with varying patterns.

Explain your understanding:

- Consider these three patterns of water waves:

A

B

C

- Describe the similarities and differences of the three patterns of water waves.
 - The wave patterns between pictures A and B are similar because they both have interference patterns which shows there are multiple sources. Picture C's wave patterns does not show any wave interference. A and C also share the similarity of frequencies and this is shown from the crests and troughs of the wave. C and B do not have any other similarities other than the amplitude of the waves.
- Experiment to make similar patterns, then explain how you can use the simulation to make each.
