Maquito, 2024-12-10 One feature of this book is the clarification of the development mechanism of Asia as a regional economy for over half a century based on an Asian Economy Within the Global Economy approach that goes beyond the single country analytical framework The development of emerging economies has caught the world's attention from the Newly Industrializing Countries or Newly Industrializing Economies of the 1980s to the BRICs entering this century General economics cannot clarify the internal mechanism of the changing of newly industrialized economies led by Asia This book clarifies such regional development structure by focusing on the direct investments of multinational firms and the importance of gradual changes of specific policies adopted by newly industrialized economies Moreover the book concretely deals with the US China trade war and China's Belt and Road Initiative BRI as a problem of Asian economies In so doing the book not

only perceives the structural change of the global economy as a structural change from a US centric global economy of the twentieth century to a China centric one but also focuses on the birthing of a new growth frontier in the world economy under a crisis brought about by a war for hegemony between the US and China The investment initiative through China's BRI has prompted the investment competition between Japan and the US which has made even stronger the possibility of giving birth to a new economic frontier in Afro Eurasia Another feature is the consideration of various issues that confront Asian countries in their search for economic development using the Philippines as a case study The analysis of the study points to the importance of a shared growth perspective which is based on an Asian development model and discusses the challenge of overcoming the issues of the economic development model within the region At the same time this book studies the significance and new issues as a region of the economy and overseas policies of attention drawer China
