

DSLR-A300X

DSLR Camera w/ DT18-70mm F3.5-5.6 Zoom & DT55-200mm F4-5.6 Telephoto Zoom

DSLR quality with point-and-shoot simplicity. The Sony® α (alpha) DSLR-A300 links you and your subject with Live Preview on a large 2.7" LCD monitor, for point-and-shoot simplicity – with super-quick AF response, 10.2 MP quality and in-camera SteadyShot INSIDE™ image stabilization that works with Sony, Carl Zeiss® and Minolta α -mount lenses.

- **10.2 MP CCD**
Superb image quality gives you great DSLR shots right from the start, with a large APS-size CCD imager developed by Sony to expand dynamic range, and minimize noise more effectively for clear, sharp photos even at high sensitivity settings (up to ISO 3200).
- **Live Preview of Your Subject**
The DSLR-A300's Live Preview mode links you and your subject on a large 2.7" LCD screen, for a familiar point-and-shoot style – with super-quick AF response and accurate exposure control to help you catch the perfect moment. In Live Preview mode, the camera bypasses the optical viewfinder mirror to create a live "eye-to-eye" view of loved ones, children, pets and fast-changing scenes.
- **Tiltable 2.7" Clear Photo LCD Plus™ Screen**
A large built-in screen with 2-way angle tilt provides a sharp, clear view of your subject and tilts up or down for low-angle or high-angle monitoring in situations where you want a child-level or overhead shot.
- **Continuous Shooting While Viewing**
The DSLR-A300 lets you shoot continuously at up to 3 frames per second while you see your subject in the viewfinder¹, so you never lose track of the action. In i-REG mode, you can shoot up to the limit of your flash memory card; in RAW Burst Mode you can capture up to 6 shots, with intelligent buffer management to allow more shots to be captured without waiting for the buffer to clear.
- **Smart Teleconverter 2X Zoom**
At the touch of a button you can zoom in electronically on your subject, reproducing pixels on a 1.5 basis with no degradation in picture quality. One touch zooms in at 1.4x, the second touch advances to 2X zoom – creating the 35mm equivalent of a 200mm telephoto effect with the DSLR-A300's standard 18-70mm zoom lens.

- **Expanded ISO Sensitivity**
A broad sensitivity range from ISO 100 to ISO 3200 enables the DSLR-A300 to capture beautiful color images even in very dim light – with High ISO Noise Reduction technology that reduces picture noise artifacts at high-sensitivity ISO 1600 and ISO 3200 settings by eliminating noise from RAW data after analog-to-digital conversion.
- **SteadyShot INSIDE™ In-Camera Image Stabilization**
Because image stabilization is built into the DSLR-A300, every lens benefits by an advantage of from 2.5 to 3.5 exposure stops. This allows you to shoot effectively with minimum blur even in low light without flash – or adjust exposure control for smaller lens aperture, to increase depth of field and bring both foreground and background into sharp focus.
- **BIONZ™ Image Processor**
The "brain" of the Sony® α (alpha) DSLR-A300 is the advanced Sony BIONZ™ Image Processor, using hardware-based Large Scale Integrated (LSI) circuitry to enhance images with rich tonal reproduction, improved white balance and exposure control, and expanded Buffering Optimizer capabilities. With 2-channel data transfer from CCD to processor, your camera can also respond faster.
- **1200-zone Evaluative Metering¹**
Exposure information from the image sensor dedicated to Live View is divided into 1200 zones of luminance and RGB color information. In addition D-Range Optimizer technology contributes to judge the scene and then determine the optimum exposure to reproduce images with a more natural look.
- **Dynamic Range Optimizer**
To improve results with backlit subjects and recover details hidden in shadows or lost in glare, the DSLR-A300 provides Dynamic Range Optimizer at two levels: Normal DRO, to improve detail using standard gamma curves for fast shot-to-shot response time, or Advanced DRO, to adjust dynamic range area-by-area for the greatest precision.

- **Anti-Dust Technology**
Changing lenses in a DSLR can allow dust to enter the camera – so to keep the CCD imager cleaner for better pictures, the DSLR-A300 utilizes both static-free anti-dust coating on the CCD filter and an anti-dust vibration that automatically shakes the CCD to dislodge dust each time the camera is shut off.
- **Auto Pop-Up Flash**
The camera flash automatically pops up and fires when needed, to help first-time DSLR photographers shoot more effectively. Auto Pop-up works in Auto mode and some scene selection modes; flash is cancelled in Landscape, Sport or Sunset modes and in "Flash Off" position on the Exposure Mode dial.
- **Eye-Start Autofocus System**
It begins precision autofocus adjustments the moment you raise the camera to your eye – so unlike some DSLR cameras that don't start focusing until the shutter button is half-pressed, the Sony DSLR-A300 never slows down your ability to catch fast action.
- **9-Point Center Cross AF Sensor**
A fast focus motor and improved focus control help bring images into sharp definition more quickly, with predictive focus control that automatically calculates the position of a fast-moving subject.

Sony Dslr A10user Guide:

Sony Alpha DSLR A100: A Better Manual Ken Milburn, 2007-05-04 This unique manual is better than the manual that comes with your camera in several important ways. It's organized according to efficient workflow so you can get the most out of your Sony A100 quickly and with the least amount of bother. You can find what you're looking for interactively by using the interactive Table of Contents, choosing one of the questions in the Quick Answers section, or by following any of the convenient links we've placed throughout the document. It's not a book unless you want it to be. It's a PDF that you can read on your computer or on a PDA that fits into your camera bag. It is laid out on an 8.5 x 11 inch page so if you want to print you won't have to waste paper or spend time configuring your printer. Because it's a PDF, you can find subjects you're looking for by searching electronically. Typing Cmd/Ctrl+F brings up the familiar search dialog. So all you have to do to jump straight to all the references to a particular part or feature is to enter its name. No reliance on a mindreading indexer. The PDF is photographically illustrated so you can see exactly which combination of buttons, knobs, wheels, and menu choices will help you make the magic you are hoping for. In addition to teaching technically correct procedures, this document offers valuable hints for taking photographs in some of the toughest situations. **PC Magazine**, 2006 **Sony Alpha DSLR-A100 Digital Field Guide** David D. Tomlinson, 2015-07-19 In *Getting Started in Photography*, Photographer and writer Shawn M. Tomlinson creates a quick guide to help budding photographers. The book includes equipment advice, exercises for becoming better photo processing basics, and more. From the book: What anyone starting out needs is well a starting point. Some basic information about equipment and technique to get everything moving. And hey, I'm here to help. In part two, *Great Starter DSLR*, Revisiting the Sony A100, he takes an in depth look at the camera and continues his series devoted to helping budding photographers get started without breaking the bank. In this case, Tomlinson considers the first Sony DSLR, the A100. From the book: After waiting the proper mourning time for Minolta, about a year, Sony took the black armband off and unveiled its first DSLR, the A100. And why is this important now? It's vitally important if you are a beginning photographer and want to get a great DSLR and great lenses that won't mortgage your house. [Sony A300/A350](#) Shawn Barnett, 2012-11-12
