SYSTEMATIC INSTRUCTION IN READING FOR SPANISH-SPEAKING STUDENTS Elva Duran, 2013-04-01 Students whose first language is not English are the fastest growing group in public schools in all regions of the United States. Almost 10 million children between the ages of five and 17 live in the homes and communities in which a language other than English is spoken and presently most schools in the U.S. are educating many English learners. The achievement of Hispanic students needs to improve dramatically over the next five years and this book describes the cornerstone elements for bringing about this change. The initial chapter introduces direct instruction to be used with reading and literacy programs. Chapters 2 and 3 provide excellent review of the literature in language development and address developing language instruction: listening and speaking with Spanish-speaking students and offers what a comprehensive language development program should look like. Chapter 4 reviews academic language and literacy instruction while the next addresses the components of instruction in Spanish. Chapter 6 offers lesson plan suggestions for Spanish-speaking students while the following two sections discuss components that transfer and do not transfer in Spanish to English reading instruction. Chapter 9 reviews English language development and provides lesson plans for implementing SDAIE programs. Finally, Chapter 10 discusses two-way bilingual immersion and shares actual classroom schedules and lessons. This unique text will help in the preparation of primary grade teachers throughout the U.S. so that they may be successful with Hispanic students entering the public schools with little or no English background. It will also be a useful tool for school districts staff development in addressing school improvement goals for increasing the achievement of Hispanic students. **The Crosscultural, Language, and Academic Development Handbook** Lynne T. Millennial Teacher Identity Discourses Janet Alsup, 2019-02-04 Over ten years after the original edition of *Teacher Identity Discourses*, Janet Alsup revisits her work with a new research study examining the characteristics of the millennial teachers now beginning to populate K-12 classrooms. Building off the first edition, this text is based on a qualitative interview-based research study and provides a contemporary look at how millennial teachers experience professional identity growth through language use. This innovative research investigates how formation of a professional identity is central in the process of becoming an effective teacher. Updated with new analyses of teacher identity discourses, the second edition covers themes that still resonate today and provides practical suggestions and sample assignments for teacher educators to use or adapt in methods courses. **Teaching Children to Read and Write** Robert B. Ruddell, 1999 New edition of a textbook intent on creating the kind of teachers that students remember for the rest of their lives. Covers early reading and writing development, building vocabulary and comprehension connections using literature and reader response and understanding language and cultural diversity. **21st Century skills for the standards-based Classroom**, Interdisciplinary Language Arts and Science Instruction in Elementary Classrooms Valarie L. Akerson, 2020-08-11 This volume brings together evidence-based

approaches to interdisciplinary language arts and science instruction. Firmly grounded in the research showing cognitive parallels between the two subjects and reflecting the many recommendations in recent years for using interdisciplinary instruction at the elementary level, its goal is to help teachers effectively use this kind of instruction in elementary classrooms. The book is organized around three themes: Introduction to Interdisciplinary Science and Language Arts Instruction; The Influence of Interdisciplinary Science and Language Arts Instruction on Children's Learning; and Research on Preparing Elementary Teachers to Use Interdisciplinary Science and Language Arts Instruction. Each chapter summarizes the research on its focal topic, examples of research applied to practice, and questions and prompts for discussion and reflection to help readers apply what they are reading in their own classroom contexts. Teacher educators and prospective and practicing elementary teachers everywhere will benefit from this overview of current research and practice in interdisciplinary science and language arts instruction.

A Course for Teaching English Learners Lynne T. Díaz-Rico, 2008. A Course for Teaching English Learners. CTET Handbook offers strategies to equip teachers to work with English language learners, balancing fundamental principles with practical classroom techniques. This book offers in a single volume a wealth of background principles underlying the cultural, linguistic, and sociocultural contexts and foundations of learning, and by providing a comprehensive framework that doesn't only focus on reading and writing. Provisions in the federal No Child Left Behind Act (NCLB) call for yearly accountability in English language growth for language minority students. The CTET Handbook addresses the new focus on testing procedures as well as adaptation for English learners during the test-taking process. Throughout, Lynne Diaz Rico provides the necessary background knowledge needed to educate English learners and also includes a variety of classroom methods for English language development in listening, speaking, reading, writing, and computer-assisted instruction. From publisher's description.
