pillowcase a bag or even a jar cover for jam

Stitching through the Seasons has charming patterns that are sure to spark creativity and festivity for embroiderers both experienced and just starting out Stitching Idyllic: Spring Flowers (SECOND EDITION) Ann Bernard, 2016-07-02 Make a Beautiful Embroidered Garden Come to Life Imagine an idyllic garden filled with your favourite spring flowers now you can make it come to life with this step by step guide to embroidering a beautiful garden scene Find concise instruction on how to stitch 23 different spring flowers and trees You ll learn how using unique adaptations of only four basic stitches Straight Detached Chain Buttonhole and French Knots Both novice and experienced stitchers will certainly improve their embroidery skills while creating an original garden scene that is unique and made by you Ann Bernard trained at the Royal School of Needlework and has a lifetime of stitching experience and tips to share Her approach makes stitching fun and easy to learn with detailed directions diagrams and photos leading you every step of the way **The Expository Times** James Hastings, Ann Wilson Hastings, Edward Hastings, 1910 The Expository Times , 1910 *The Cutter's Monthly Journal of London & Paris Fashions* , **Stitching the World: Embroidered Maps and Women's Geographical Education** Judith A. Tyner, 2016-12-05 From the late eighteenth century until about 1840 schoolgirls in the British Isles and the United States created embroidered map samplers and even silk globes Hundreds of British maps were made and although American examples are more rare they form a significant collection of artefacts Descriptions of these samplers stated that they were designed to teach needlework and geography The focus of this book is not on stitches and techniques used in drafting the maps but rather why they were developed how they diffused from the British Isles to the United States and why they were made for such a brief time The events of the late eighteenth and early nineteenth centuries stimulated an explosion of interest in geography The American and French Revolutions the wars between France and England the War of 1812 Captain Cook s voyages and the explorations of Lewis and Clark made the study of places exciting and important Geography was the first science taught to girls in school This period also coincided with major changes in educational theories and practices especially for girls and this book uses needlework maps and globes to chart a broader discussion of women s geographic education In this light map samplers and embroidered globes represent a transition in women s education from accomplishments in the eighteenth century to challenging geographic education and conventional map drawing in schools and academies of the second half of the nineteenth century There has been little serious study of these maps by cartographers and moreover historians of cartography have largely neglected the role of women in mapping Children s maps have not been studied although they might have much to offer about geographical teaching and perceptions of a period and map samplers have been dismissed because they are the work of schoolgirls Needlework historians likewise have not done in depth studies of map samplers until recently *Stitching the World* is an interdisciplinary work drawing on cartography needlework and material culture This book for the first time provides a critical analysis of these artefacts showing that they offer significant insights into both eighteenth and nineteenth century geographic thought

and cartography in the USA and the UK and into the development of female education **Proceedings of the 2024 10th International Conference on Advances in Energy Resources and Environment Engineering (ICAESEE 2024)**

Approach To Management, The: Steering Organizations Into The Future John Conbere, Alla Heorhiadi, 2018-04-09 Many organizational leaders may not even realize that most of their strategic decisions are made without accurate or full information And yet more than 40 years of socio economic research indicate that around 40% of what happens economically in organizations is not taken into consideration by traditional accounting This lack of information affects an organization s effectiveness by turning organizational functions into dys functions which leads to hidden costs Socio economic research shows that average hidden costs are more than 20 000 per employee per year Socio Economic Approach to Management SEAM is a different way to lead and manage organizations or to put simply steer them What differentiates SEAM from traditional management First SEAM focuses on both the people and economic sides of the workplace Second SEAM identifies and reduces hidden costs through engaging employees and developing their potential The results are increased efficiency and profitability sustainable organizational development and higher employee engagement SEAM was developed in France and is little known in the US This book provides a sound introduction to SEAM for the English speaking audience The book will be of interest for organizational leaders and managers who search new ideas techniques and tools to increase the efficiency of their organizations The book will also be beneficial for change management and HR practitioners
