Solberg, 2006-10 Are you committing financial suicide Educate yourself about finances polish your money management skills and build a dynamite portfolio with Financial Invigoration for the Average Joe The New Law of Demand and Supply Rick Kash, 2002-09-17 A groundbreaking business book for the twenty first century The New Law of Demand and Supply overturns the traditional supply side approach to how business is done showing why a demand based approach is essential to success in today s economy For more than two hundred years companies have based their approach to business on supply side economics concentrating on creating products and services and then attempting through marketing publicity distribution and promotion to stimulate a demand for them While most companies have factored in customer feedback focus groups and broad based market research their basic approach has remained the same And it is a mistake In The New Law of Demand and Supply Cambridge Group CEO Rick Kash argues that in order to succeed in today s market companies must reverse their approach by first determining what current and emerging demand exists and then by creating products and services to meet that demand For a host of reasons from the reduced life cycles of products and services to deregulation to increased competition as a result of globalization to the ability of customers to compare prices and values at a keystroke the market Kash argues has fundamentally and permanently changed from one that is driven by supply to one that is driven by demand Traditional businesses that remain locked in a supply side mentality are doomed to failure Today s most successful companies from McDonald s to IBM from EMC to Pepsi Cola use the principles of demand strategy to first understand all the factors that go into creating demand in their targeted markets as well as what their emerging needs will be in the future In the heart of the book Kash outlines a specific six step demand strategy on how to implement a demand first approach from homing in on who your most profitable customers are to determining what needs they have whether articulated or not that are not currently being addressed Using that information companies can create unique products that are differentiated from their competitors to meet those demands Rather than being forced to compete on price they can trump the competition by competing on value offering the options features products and services that better meet an existing demand As a result companies often can actually charge more for what they produce and improve their margins Diving under the hoods of a score of successful Fortune 500 companies that have made demand strategy central to the way they do business including Gatorade Capital One Sara Lee and Sears Kash details how these companies have used this strategy to re create their
