### **ADJUSTING EVENTS**

**Events after the reporting period** are those events, favourable and unfavourable, that occur between the statement of financial position date and the date when the financial statements are authorised for issue.

**Adjusting events** are those that *provide evidence of conditions* that existed at the statement of financial position date.

1. Examples of adjusting events include:
  - a. The settlement of a court case (which begun before the end of the reporting period) after the reporting period, change is made to the provision for cash settlement
  - b. The receipt of information indicating that an asset was impaired at the end of the reporting period (e.g. bankrupt debtor or loss in value of stock)
  - c. The determination, after the accounting period, of the cost of assets purchased or receipts from assets sold
  - d. The determination, after the reporting period, of the amount of profit-sharing or bonus payments if the entity had an obligation before the end of the reporting period to make such payments
  - e. The discovery of fraud or errors
2. An example of a non-adjusting event after the reporting period is a decline in market value of investments between the end of the reporting period and the date when the financial statements are authorised for issue. The decline in market value does not normally relate to the condition of the investments at the date of the reporting period, but reflects circumstances that have arisen subsequently.
3. If an entity declares dividends to holders of equity instruments after the reporting period, the entity shall not recognise those dividends as a liability at the end of the reporting period.
4. The following are examples of non-adjusting events after the reporting period that would generally result in disclosure:
